

13 Feb 1845

Dear Sir

The Names of the Birds here
now been examined and divided
into four collections thus.

Birds Museum. ————— 351 specimens

Collection no. 1 ————— 140 ————
College Surgeons

~~Haslar~~ 2 ————— 79 ————

~~Leiden~~ 3 ————— 40 ————

Besides these there are ^{Paris} 52 ————

either evidently erroneously named
or not named at all which are
therefore of comparatively little use
to any person. Pray indicate
whois to have series no. 1. 2. 3.

I have kept every horn of the

Jarvis but evident. duplicates

You will observe that I have now
put aside to keep in the Museum
a complete series of the skulls.
Horns of mammalia and of
the bones of the birds. I have not
as yet done any thing with
regard to the more or less imperfect
skeletons of the mammalia which
evidently are not fitted for the
Zoological collection (as I told you
when first I saw them) but I hope
to have to communicate with

you respecting them hereafter
You will sign the enclosed
order & return it to me I will
send it Mr. Rice from the Drawing
of North what I hear they have
cutly formed

Yours very truly

J. S. Jones
