

Josh Wain Jan 22

50

My dear Brian

I trust to inform

you by way of supplement

to my this days despatch

that I have seen Japer is a

very nice looking lady like

Yacqueline pit, all shown =

she dresses remarkably well

like proper especially far better

than Peter, with expression

rather fresh tint. She has

just finished one of Japer's

Prussianian for his patented

a remarkably nice water color

portrait.

Jan Japer is certainly a

most agreeable well looking

man - but probably much

attended since you saw
her - She was magnificent
besides but rather large
fashioned articles & her trunks
are small. In manners
she is remarkably pleasing
& quite engaging I should say.

I saw Montrose in
the course but only at a
distance.

Miss Lovell wears a fresh
deal & always in a very
tasteful costume, she dresses
really simply & elegantly,
& is certainly as lady like
a person as any in Columbia
& in manners deep & impressive.

Some one remarked yesterday
that she had given quite
pretty

The tide of expectation &
gaitly has ebbed out for the
season at Columbia. As you all
you can hear from me would
not suppose many weeks
before - till one transmission
that this season has been
unprofitable for gaitly

Joseph had the prettiest time
out in the course, but poor
yellow I fear it after having
an aching breast. He certainly
does credit to a Professor's
judgment, but my lawyer
his time for promotion is all
but up. He cannot hold the
P. Office must change. He would

still prefer a Calcutta apple
for his families sake but
supposes that he will be
obliged to take a European.

He thinks of the sugar being
if, as is probable that is to
be kept down to 2500 but

unfortunately however good
his character was as a
sugar estate it is now so
low as a matter of business

that I should doubt his
standing a short of a season

Further a bundle is talked
of for it. amongst whom there
is plenty of choice. Hence

Lytle reports a Calcutta judgment
I hope the station may be
healthy one.

I am to see Church tomorrow

morning. He is at Spence's.

Lytle has just received the
future bank for Fulmer.

Together with his copy of the
Rhod. book.

Dr (Fulmer) writes Feb 27
will but pale & is reputed
silly & unable to retain

the garden. I only saw him
at the College for a minute.

He reports the Rhod. seeds
to be sprouting up as a
"swarm of green" in Calcutta

garden. The Lamb is also
sprouting. All are "leaves"
cases.

Botham's printer girls
set out across a glass being
character. He writes of one

of the most successful looking
cuts I ever set eyes upon
Galena says that Strachey's
Himalayan work was the
most superior he ever set eyes
upon, & that all his operations
Geometrical, Meteorological
& Botanical are unrivalled
His cross sections from the Snow
to the plains are both
panoramic & exact with
details
of elevation, temperature
Geology, Plants, animals & all
else. He went a long way
into Tibet over the
shrub the whole season,
upon the work. He &
Madler published together,
& at once on their returning

England. So tell Thomson that
we must look to our points.

8 Oct 23! I have just had a
long talk with Thursty. He says
the Michael Dumbrie firm & some
other Rajah interests & young
Bahadur brother (now supreme)
to Esoteric not likely to get on
very little referring. His own
doubts are settled. J. B. would
like interceding an Englishman
to act liberally traveling during
his absence, when the said
traveler would be under the
care of others, - & when the general
feeling of the people might
be against the measure, &
when he himself could not
be present to give confidence.
The best plan by far he
says is to wait till November

When your kindred will be
back again wishes every thing
is certain to go on well &
when he is certain to promote
ad libitum intercourse with
us. I however grasp the
present opportunity & he will
undoubtedly in J. H. return
from Jerusalem for which
I consequently wait.

Yours affectionately

J. H. Hooker
