HODGSON'S  
ZOOLOGY OF NIPAL.

---

MR. BRIAN HOUGHTON HODGSON, who has for some years past resided in an advantageous situation for the Collection and Study of the various Quadrupeds and Birds of the Hills, proposes to Publish by Subscription, a Work, calculated alike to satisfy the Scientific and the Sporting communities.

The Drawings are admirably faithful, and comprise some Four Hundred Birds, and One Hundred Quadrupeds and their allies. The text will furnish all procurable information as to the Habits and the Manners of the subjects portrayed by the pencil; and the Author will have the assistance of able co-operation in England, where the work will be got up in the best style, under the superintendance of Mr. FRANK HOWARD, who has produced Captain W. C. HARRIS'S "Portraits of African Animals."

It will contain almost all the Game Birds and Beasts of the Bengal Presidency, which are no where so common now, as in the Nipalese Tarai.
