

Lord Derby wrote to me that you have  
written which shall send off his  
Box of specimens?  
The list of drawings only refers to the manuscript

My dear Sir

The list sent are correct as  
the numbers. but the names  
as I am assured are ludicrously  
wrong but this arose from  
the ignorance of the copier but  
I thought you would be able to  
recognize them when you send  
them back the names shall  
be corrected

It was quite impossible to  
describe the new species until  
the whole collection was sorted.

that the new & old might be compared  
and you appeared so fearful  
that we should keep all that I  
considered the sooner we could  
set the duplicate out of the  
Museum the better you would  
be pleased.

The Mammalia Her. Heads &  
Horns (ex clusive of the more or  
less imperfect skeletons which are  
not yet unpacked) have been  
sorted as follows.

The Birds bones are nearly finished  
 I much fear that there are many  
 errors in the numbering of them  
 two very differing kind having the  
 same number & the bills show they  
 evidently don't belong to the species of  
 the number

We have seen no more of the bones  
 than you written to the Recs of the  
 Jnl. for about the drawing?

I believe they have us or very few  
 birds bones at the Jnl. for. The  
 Anatomical Museum I mentioned

was Haslar - near Gosport under  
 the care of Dr John Richardson the  
 Arctic Traveller. You see I stay
