REPORT OF THE COUNCIL

for the year ending 31st December, 1912.

ANNUAL GENERAL MEETING.

THE Eighty-fourth Annual General Meeting of the Society will be held on Tuesday, April 29th, 1913, at 4 p.m. at the Offices of the Society, at the Gardens, Regent's Park, N.W.

PROCEDURE AT THE ANNUAL GENERAL MEETING.

(By-Laws, Chapter VII., Sections 1 and 2, as amended August 18th, 1904.)

SECT. I. Notice of the time and place of the Annual General Meeting shall be advertised by the Council in four or more of the public Newspapers, at least fourteen days before the same shall take place.

SECT. II. The course of procedure at the Annual General Meeting, after the Chair has been taken, shall be as follows :—

- 1. The reading of the Minutes of the previous Annual Meeting.
- 2. The Appointment of Scrutineers and opening of the Ballot.
- 3. Presentation of the Auditors' Report, previously
- issued to Fellows.
- 4. Discussion of the Auditors' Report.
- 5. Presentation of the Council's Annual Report, previously issued to Fellows.
- 6. Discussion of the Council's Annual Report.
- 7. To receive the report of the Scrutineers on the result of the Ballot.
- No other business shall be transacted at such Meeting.

A 2

STATE OF THE ROLL OF MEMBERS.

Fellows.

The number of Fellows and Fellows Elect on the 1st of January, 1912, was 4,477.

During the year 339 Fellows were elected or readmitted, and 228 died or otherwise ceased to be Fellows, the net addition to the roll for the year being 111; the total number on the roll on January 1st, 1913, reached 4,588, the largest in the history of the Society.

Until 1906, the amounts paid by Fellows as composition for their annual subscriptions were treated as income, but in that year the Council raised the amount of the life composition from ± 30 to ± 45 , and decided to invest the sums received. The annexed table sets forth the state of the Roll of Fellows in 1905 (the last year before the new system was adopted) and in 1911 and 1912.

				1905.	1911.	1912.

4

It was the intention of the Council to proceed with the recommendation of Candidates for the Fellowship until the roll stood at the number of 5,000, and thereafter only to fill vacancies. It is doubtful, however, if such a limitation, exercised either by the Council or the Fellows, would be within the terms of the Charter, and when the number reaches 5,000 it may be advisable merely to reduce the privileges of Fellows in excess of that number. Comparative Statement of Elections, Deaths, Resignations and Removals during the past Ten Years, with the number of Fellows at the end of each Year.

Honorary, Foreign and Corresponding Members.

The following gentlemen were elected to fill vacancies on the lists :--

Honorary Member-

Lt.-Gen. Sir Francis Wingate, G.C.V.O., K.C.B., K.C.M.G., The Palace, Khartoum, Sudan.

Foreign Member-

Prof. Gustaf Retzius, M.D., Medico-Chirurgical Institute, Stockholm.

Corresponding Members-

Herr Carl Hagenbeck, Tierpark, Stellingen, near Hamburg.

Mr. Norman B. Kinnear, Bombay Natural History Society, Bombay.

Mr. Wilfred A. Smithers, Cordova, Argentine Republic, South America.

Prof. Mattoso Santos, Instituto Zoologico, Escola Polytechnica, Lisbon.

PRESENTATION OF THE SOCIETY'S SILVER MEDAL.

The Silver Medal of the Society was awarded on March 6, 1912, to Major J. Stevenson-Hamilton, C.M.Z.S., Game Warden of the Transvaal, in commemoration of the King's South African Collection. Major Stevenson-Hamilton rendered the Society great assistance in making the arrangements for the formation of this valuable Collection and for its transport to London.

SCIENTIFIC WORK OF THE SOCIETY.

According to the terms of the Charter, the Society exists not only for 'the introduction of new and curious subjects of the Animal Kingdom,' but for the 'advancement of Zoology and Animal Physiology.' In addition to maintaining the Gardens for the education, study and pleasure of those interested in zoology, the Society takes a share in the advancement of knowledge in more direct modes.

The Evening Scientific Meetings have been well attended, and many important contributions to Zoological Science have been made to them. On the evening of each Meeting a motor omnibus leaves Regent's Park Tube Station at 8.15 p.m., conveying Fellows direct to the Meeting Room, and there is a similar return service at 10.30 p.m. at the conclusion of the Meeting.

The Society has hitherto hired a Lantern for its Scientific Meetings. Sir E. G. Loder, Bt., a Vice-President, has presented an Optical Lantern for the better illustration of the Lectures and Demonstrations. The instrument, which has been specially constructed by Messrs. Newton & Co., is so arranged that either lantern slides or pieces of apparatus, pond life, or other objects, etc., can be shown as desired. The Lantern is illuminated by a powerful electric arc lamp, a special cable having been laid on for the purpose, so that the Society is now equipped with a piece of optical apparatus really worthy of the important work it does.

The annual "Record of Zoological Literature," as stated in last year's Report, was produced in co-operation with the Zoological Volume of the "International Catalogue of Scientific Literature," Vol. XLVIII., covering the literature of 1911, being the first issue for a second period of five years. Index Zoologicus, No. II., and the Decennial Index to the Society's Scientific Proceedings, were also prepared and published.

The rules for zoological nomenclature, and especially what is called the law of priority, have been engaging the attention of zoologists. At a Scientific Meeting of the Society in 1910 (P.Z.S. 1910, p. 101), Dr. W. E. Hoyle, English Member of the International Commission on Zoological Nomenclature, explained the Report presented to the Graz Meeting of the International Zoological Congress. As a result of subsequent discussion, the meeting declared itself strongly in favour of the International Congress giving its authority to the formation of a List of Zoological Names, the significance of which should not be altered by application of the rules of the International Code. Understanding that the question would come up for discussion at the meeting of the Congress at Monaco in March, 1913, the Council appointed a Committee consisting of Dr. F. A. Bather, F.Z.S., F.R.S., Dr. S. F. Harmer, F.Z.S., F.R.S., Professor E. W. MacBride, F.Z.S., F.R.S., Mr. R. I. Pocock, F.Z.S., F.R.S., Mr. O. Thomas, F.Z.S., F.R.S., and Dr. P. Chalmers Mitchell, Sec. Z.S., F.R.S., to advise as to what instructions should be given to the official representatives of the Society at the Congress. On the unanimous advice of the Committee, the Council passed the following resolution :--

"The President and Council of the Zoological Society, although giving freedom of action to their delegates at the Monaco Meeting of the International Congress of Zoology, desire to inform them that in their opinion an absolutely invariable application of the rule of priority in zoological nomenclature is not to the advantage of zoological science, and that they would welcome a modification

of it, as for instance by the establishment of an authoritative fiat list of reserved names."

The Secretary, Mr. O. Thomas, and Dr. F. A. Bather were appointed to represent the Society at the Congress.

The Society's Library has been of great service to zoologists. Many new volumes have been added by purchase or presentation. A list of books recommended by Fellows for purchase is kept by the Librarian and is considered at the meetings of the Library Committee. The Society was represented by the President, H.G. the Duke of Bedford, K.G., at the celebration of the 250th Anniversary of the foundation of the Royal Society. The Secretary, Dr. P. Chalmers Mitchell, F.R.S., and Mr. Guy A. K. Marshall, F.Z.S., were nominated to represent it at the Second International Congress of Entomology at Oxford; and Mr. H. G. Plimmer, F.R.S., at the First International Congress of the Society of Comparative Pathology at Paris. The Secretary, Dr. P. Chalmers Mitchell, was President of the Zoological Section of the British Association at Dundee, and took "Zoological Gardens and the Preservation of Fauna" as the subject of his address.

The scheme for the instruction of school teachers, arranged in 1910 by the Council in co-operation with the Education Committee of the London County Council, has been carried out in the extended form described in last year's Report. Each course can be attended by 150 teachers, and consists of three lectures with lantern demonstrations in the Society's Meeting Hall, and the number of practical demonstrations in the Gardens necessary to give the teachers, in groups of twenty-five, a demonstration for each lecture. The three courses for 1911-1912 were conducted by Mr. J. L. Bonhote, M.A., F.Z.S. The same gentleman took charge of the first course for the Session 1912-13, and the two others have been put in charge of Mr. Frank Balfour-Browne, M.A., F.Z.S. The London County Council supplies a grant towards the expenses of the scheme, the object of which is to make the visits of school children, afterwards brought by their teachers, more useful.

The Anatomical and Pathological work in the research laboratories at the Prosectorium has been actively prosecuted, and the new laboratories provide better accommodation than was formerly available. Fellows who desire to engage in research are requested to communicate with the Secretary or with the Prosector.

BEE-KEEPING.

The Council arranged with the British Bee-keepers' Association, which had received a grant from the Development Commissioners for the establishment of an experimental and educational Apiary in London, to provide accommodation at the Gardens. A site on the North Bank of the Canal was selected for the Apiary, made suitable for hives and for demonstrations, and the use of the lecture-room for lectures was given. The Association paid the Society a small rental to cover expenses, and agreed to remove the bees if their presence proved injurious to visitors or to the animals. So far as the Society is concerned, the arrangement worked satisfactorily in 1912.

EXHIBITION OF PHOTOGRAPHS OF BRITISH ANIMALS.

The Council agreed to lend the Zoological Photographic Club the use of the Meeting Room for an Exhibition of Photographs of British Animals, the Club to pay all expenses of framing and hanging the photographs, the Society to provide suitable screens, pay the cost of a catalogue, and take receipts for admission and money received for catalogues sold. The exhibition proved to be of remarkable interest, and was visited by many naturalists, but failed to attract the general public.

SCIENTIFIC MEETINGS.

To the twelve meetings for scientific business held in the Society's Rooms in 1912, 89 communications were made. Of these, 73 were from Fellows and 6 from Foreign or Corresponding Members. The remaining 10 papers were from individuals not belonging to the Society, and were communicated by the Secretary or by other Fellows. The total number of communications in the year 1911 was 105.

These communications were submitted to the Committee of Publication, by which 52 were ordered to be printed in the 'Proceedings,' and 2 in the 'Transactions,' such illustrations being in each case allowed as the Committee considered necessary for the purpose. Of the remaining communications, abstracts or extracts were considered to be sufficient for publication.

PUBLICATIONS.

Abstract.

Since January, 1904, the Society has published on the Tuesday following the date of each Scientific Meeting an Abstract of the Proceedings. It is issued with the Proceedings free of charge to all Fellows who subscribe to the Publications; but it may be obtained on the day of publication at the price of *Sixpence*, or, if desired, it will be sent post-free for the sum of *Six shillings* per annum, payable in advance. The *Abstract* contains no scientific matter that will not be published afterwards in the *Proceedings*, but is convenient as a more rapid means of publishing new anatomical facts, or the descriptions of new species, and it announces, whenever possible, the communications to be made at the next Scientific Meeting.

Proceedings.

The *Proceedings* of the year are issued in two volumes, indexed separately, each of which contains two parts. The year's issue has consecutive pagination throughout, so that the complete reference to any memoir after 1905 is "P.Z.S., 19-, p."

The four parts of the 'Proceedings' for 1912 were issued in the months of March, June, September, and December, thus completing the two volumes within the year, and securing a more even distribution than was formerly possible.

The two volumes for 1912 contain 913 pages (exclusive of the indexes, which are now paged separately) with 97 plates and 126 illustrations in the letterpress. In the following Table are given the number of plates and pages of the volumes of 'Proceedings' for the past ten years:—

	Plates.	Pages.	1000	Plates.	Pages.
1903	57	780	1908.	68	983
1904	60	1010	1909.	86	952
1905	37	937	1910 .	101	1033
1906	70	1034	1911 .	64	1213
1907	56	1121	1912.	97	913

Decennial Index.

An Index-volume of the Proceedings, for the ten years 1901-1910, was published on November 1st. It contains:— 1. An alphabetical list of the Contributors, with references to the several articles contributed by each.

2. An Index to the Genera and Species described and referred to. ,

3. An Index of the Illustrations.

4. An Index of new Generic Terms.

The last two items have not previously been included in these Index volumes.

Transactions.

Of the Society's quarto *Transactions*, two parts, beginning a new volume, were published in 1912, viz. :--

VOL. XX. PART 1, pp. 1-72. (February, 1912.)

The Development of the Starfish (Solaster endeca Forbes). By James F. Gemmill, M.A., M.D., D.Sc., F.Z.S. (Plates I-V.)

VOL. XX. PART 2, pp. 73-134. (April, 1912.)

On the Sphingidæ of Peru. By the Rev. A. Miles Moss, M.A., F.Z.S., F.E.S., with a Preface by Karl Jordan, Ph.D. (Plates VI-XV.)

The following two parts were published early in the current year :--

Vol. XX. PART 3, pp. 135-230. (February, 1913.)

Second Contribution to our Knowledge of the Varieties of the Wall Lizard (Lacerta muralis). By G. A. Boulenger, F.R.S., F.Z.S. (Plates XVI-XXIII and Text-figures 1-4.)

Vol. XX. PART 4, pp. 231-246. (February, 1913.)

On the Crustacea Isopoda of the 'Porcupine' Expedition. By the Rev. T. R. R. Stebbing, M.A., F.R.S., F.L.S., F.Z.S. (Plates XXIV-XXVI.)

Zoological Record.

The 48th Volume of the 'Zoological Record' (which contains a List of Titles and Subject and Systematic

Indexes of the work published by zoologists all over the world in 1911) is the sixth volume under the scheme of amalgamation with the zoological portion of the 'International Catalogue of Scientific Literature.' The Editor, Dr. David Sharp, F.R.S., F.Z.S., and his staff of recorders were able to finish their work in 1912. The divisions relating to *Porifera*, *Echinoderma*, *Pisces* and *Vertebrata* (*General*), were actually published in October, the remaining divisions in December, and the complete volume on December 24th. Fellows of the Society, learned Societies and Institutions, and members of the former Zoological Record Association, who subscribe through the Zoological Society, will receive the present and future volumes of the 'Record' in the same binding and on the same terms as heretofore—that is to say, at a subscription price of 30s. per annum, the subscription being due on the first of July each year.

The complete Volume consists of separately paged Divisions. These may be obtained singly, in paper covers, stitched and lettered.

The following are the Divisions and their net prices, viz. :--

								s.	d.	
Comprehensive .	Zoolog	у						2	6	
Ductorio								2	0	
Porifera or Spon	ngida							2	0	
Cœlenterata .								2	0

* The general Division, Arthropoda, is also bound with the Divisions Crustacea, Trilobita-Arachnida-Myriapoda and Insecta, and the general Division, Vertebrata, with the Divisions Pisces. Batrachia-Reptilia, Aves and Mammalia. Purchasers of any of these special Divisions will, therefore, also receive the general Divisions in question.

Index Zoologicus, No. II.

In the year 1902, the Society published an *Index* Zoologicus, compiled by Mr. C. O. Waterhouse and edited by Dr. D. Sharp, F.R.S., in continuation of the Nomenclator Zoologicus of S. H. Scudder, issued by the Smithsonian Institution in 1882, and intended to be a complete index to the generic names used in Zoology to the close of the year 1879. The *Index Zoologicus* was an alphabetical list of names of genera and subgenera proposed for use in Zoology as recorded in the 'Zoological Record,' 1880-1900, together with other names not included in the 'Nomenclator' of Scudder.

Realizing the advantage to science of a continuance of this work, and being of the opinion that a list should be compiled at decennial intervals, the Council arranged for the issue of an Index Zoologicus No. II., covering the period 1901-1910, together with names not included in previous nomenclators. The references to the original place of publication of the names indexed are through the annual volumes of the 'Zoological Record,' but by the kind co-operation of the Council of the Royal Society, the new volume also forms an index to the Zoology volumes of the first ten annual issues of the 'International Catalogue of Scientific Literature,' the early volumes of which were distinct from the 'Zoological Record.' As before, the Council was fortunate in securing, for the preparation of the index, the services of Mr. C. O. Waterhouse and Dr. David Sharp. It was published in November, 1912, and recorded some 22,000 names.

INDEX ZOOLOGICUS No. II. Bound in cloth, octavo, pp. 324. Nov., 1912. To the Public. 15/- net.

To Fellows of the Zoological Society, and owners of sets of the 'Zoological Record' or the "International Catalogue of Scientific Literature." 12/6 net.

INDEX ZOOLOGICUS No. I. Bound in cloth, octavo, pp. 420. 1902. To the Public. £1 net.

To Fellows of the Zoological Society. 18/-net. List of Institutions, &c., on the Exchange List of the Society's Publications.

A full list of these Institutions, &c., was printed in the Report for 1902; in 1903 no change was made; since that date the following additions have been made:—

1904.

The Carnegie Museum, Pittsburgh, Pa., U.S.A.

1905.

The Bloemfontein Government Library. The Royal Zoological Society of Ireland, Dublin. The Australian Museum, Sydney, N.S.W.

1906.

Archiv für Naturgeschichte, Berlin.

1907.

Laboratoire Arago, Banyuls-sur-Mer, France. Station for Experimental Evolution at Long Island of the Carnegie Institute of Washington, U.S.A.

1908.

The State University of California, Berkeley, Cal., U.S.A. The American Academy of Arts and Sciences, Boston, U.S.A.

1909.

The Bombay Natural History Society, Bombay.

Garden Guide.

The 'Official Guide to the Society's Gardens,' written and revised annually, by the Secretary, consists of 112 pages, with many illustrations, a Plan of the Gardens, and a Railway and Street Map showing modes of access from different parts of London. The Guide is printed by Messrs. Bradbury, Agnew and Co.; it is published by the Society at its Offices, and sold there and in the Gardens at the price of sixpence in paper covers. The copyright and the profits of sale belong to the Society. Since 1903, when the first edition was published, 383,471 copies have been sold. The eleventh edition, with many new illustrations, and printed on art paper, will be published before the Annual Meeting.

Postcards.

In 1912 there were sold of the series printed in 1911,

26,756, and of a new series printed in 1912, 129,634, a total of 156,390. A new series is being prepared for 1913.

The net profit to the Society on the guides and postcards amounted to over £950 for the year.

LIBRARY.

The Library, under the superintendence of Mr. F. H. Waterhouse, the Society's Librarian, was maintained in good order throughout the year. Altogether 1,550 visits were paid by Fellows and persons introduced by them, and about 1,500 volumes were borrowed under the usual regulations.

Mr. F. H. Waterhouse retired at the end of the year and was granted a pension by the Council. He had been 40 years in the service of the Society and his amiability and knowledge have been highly appreciated by Fellows who use the library. Mr. Henry Peavot, Assistantlibrarian and Clerk of Publications since 1908, was appointed to succeed him, but is to continue his valuable services as Clerk of Publications and Assistant Editor of the Society's Scientific Publications. E. E. Riseley, Clerk in the Library on weekly wages, has been placed on the Monthly Books of the Society and, if necessary, further assistance will be provided.

Many important additions to the Library were made during the past year, among which attention may be called to the following donations :---

Donor.

I. J. Abrahams.

Donation.

List of the Animals in the Gardens of the Zoological Society, July, 1829.

PROSECTORIAL DEPARTMENT.

The work in the Department was carried on actively in 1912. The Prosector, whose report is annexed, was engaged chiefly on parasites obtained in the Gardens.

The Pathologist, who has also reported separately, made post mortem examinations of all the animals that died in the course of the year. Careful records of these examinations and specimens are preserved, and these, in course of time, will form an invaluable series of data for the study of comparative pathology. The Pathologist furnished useful practical information to the Curators and the Garden Committee.

The scheme for the systematic examination of parasites infesting animals in the collection, explained in the Report for 1910, has been acted upon throughout the year. The following papers dealing wholly or chiefly with parasitic material obtained at the Gardens have recently been published in the Society's Scientific "Proceedings":—

ROBERT T. LEIPER, D.Sc., M.B., F.Z.S. A Demonstration of Nematode Parasites obtained from animals in the Zoological Gardens. (P.Z.S., 1911, p. 620.)

WILLIAM NICOLL, M.A., D.Sc., M.B., F.Z.S.

On Three new Trematodes from Reptiles. (Plates XXVII., XXVIII. P.Z.S., 1911, p. 677.)

H. G. PLIMMER, F.R.S., F.Z.S.

On the Blood-parasites found in Animals in the Zoological Gardens during the four years 1908-1911. (Plates XLIX-LV., P.Z.S., 1912, p. 406.)

F. E. BEDDARD, M.A., D.Sc., F.R.S., F.Z.S.

Contributions to the Anatomy and Systematic Arrangement of the Cestoidea.

No. III. On a new Genus of Tapeworms (Otiditænia) from the Bustard (Eupodotis kori). (Text-figs. 19-30, P.Z.S., 1912, p. 194.)

No. IV. On a species of Inermicapsifer from the Hyrax, and on the Genera Zschokkeella, Thysanotania and Hyracotania. (Text-figs. 72-83, P.Z.S., 1912, p. 576.)

No. V. On a new Genus (Dasyurotænia) from the Tasmanian Devil (Dasyurus ursinus), the type of a new Family. (Textfigs. 92-101, P.Z.S., 1912, p. 677.)

No. VI. On a Asexual Tapeworm from the Rodent (Fiber zibethicus), showing a new form of Asexual Propagation, and on the supposed Sexual Form. (Text-figs. 113-121, P.Z.S., 1912, p. 822.)

WILLIAM NICOLL, M.A., D.Sc., M.D., F.Z.S.

On two new Larval Trematodes from the Striped Snake (Tropidonotus ordinatus sirtalis). (Text-fig. 107, P.Z.S., 1912, p. 767.)

On two new Trematode Parasites from the Indian Cobra. (Text-fig. 122, p. 851.)

Statistical Note on the Worm Parasites collected from the Animals dying in the Zoological Gardens, from December, 1910, till April, 1912. (P.Z.S., 1912, p. 856.)

The Prosector of the Society; Mr. F. E. Beddard, M.A., D.Sc., F.R.S., reports as follows :--

"During the past year the whole of my time, with the exception of routine duties, has been devoted to the study of the Cestode worms collected from animals that have died in the menagerie, and to the care of the collection of these and other parasites kept in the laboratory.

"I have published four memoirs dealing with the Tapeworms during the year, and three other papers have been or will be immediately communicated to the Society. In these contributions to the structure of the group a number of new facts relating to the anatomy of the group have been recorded for the first time, and a few new species and new genera have been defined. I have subjected to a careful examination some other forms upon which I shall doubtless be able to report to the Society later. In this way a considerable number of the entire collection of Tapeworms have been scrutinized; but many others at present await study and identification.

"Some necessary changes have been made among those who have undertaken to examine and report upon the other groups of parasites. Dr. Nicoll, on his appointment to an office in Australia, has been obliged to retire from the study of the Trematodes, and Miss Lebour has undertaken this group of worms. Mr. Coventry, on accepting the curatorship of the Bute Museum, has handed over the insect parasites to Mr. Bruce F. Cummings of the Natural History Museum."

The Society's Pathologist, Mr. H. G. Plimmer, F.R.S., reports as follows :--

"During the past year 1,539 animals have died, and detailed records have been kept of the pathological conditions. A paper dealing analytically with the causes of death, and with the blood-parasites found in the Gardens, was read at the Scientific Meeting on Feb. 4th, 1913. This memoir will be published in full in the Scientific Proceedings.

During the year Mr. J. G. Turner has been working in the Laboratory on the pathology of the teeth, and Dr. Lucas on the pathology of kidneys of birds. Pathological specimens have been sent to the Museum of the Royal College of Surgeons."

THE GARDENS.

THE KING'S NEPAL COLLECTION.

THE FEDERATED MALAY STATES COLLECTION.

The chief events for the year were the reception and exhibition of two interesting collections of Asiatic animals, respectively from Nepal and the Federated Malay States. The ground formerly occupied by the Prosectorium, the Gardeners' Department, Dung-pound, Swine and Rodent Sheds, was cleared and laid out temporarily for the purpose of this exhibition, which added many interesting animals to the collection and attracted many visitors.

As was announced in the Report for 1911, H.M. the King on his State Visit to India received a fine collection of Nepalese animals presented to him by H.H. the Maharajah, Sir Chandra Shum Shere Jung, G.C.S.I. The King graciously invited the Zoological Society to receive and arrange for the exhibition of the animals, and H.G. the Duke of Bedford, K.G., President of the Society, repeated his former generosity and paid the cost of transport to this country. The Committee of the Zoological Gardens at Calcutta took charge of the animals on their arrival at Calcutta, and Mr. B. Basu, C.M.Z.S., Superintendent of the Gardens, came home in charge of them.

The collection, on board the British India Company's S.S. Afghanistan, reached the Royal Albert Docks on May 20th and arrived at the Gardens before 8 p.m. The animals were at once installed, as all arrangements had been made for them, and they were on view to visitors on May 21st. The King and Queen and Princess Mary visited the Gardens on the afternoon of May 31st to inspect the animals. By the King's wish the visit was strictly private and no special preparations were made.

LIST OF MAMMALS AND BIRDS FROM NEPAL,

PRESENTED BY

H.M. KING GEORGE V. (PATRON AND FELLOW OF THE SOCIETY), AND EXHIBITED AS A SPECIAL COLLECTION.

Mammalia.

3 Leopards & & ? (Felis pardus).
1 Snow Leopard (Felis uncia).
2 Common Palm-Civets (Paradoxurus niger).
1 Grey Mongoose (Mungos mungo).
2 Spotted Mongooses (Mungos auropunctatus).
6 Tibetan Mastiffs (Canis familiaris) & ? and four pups.
1 Woolly Wolf (Canis laniger).
1 Himalayan Fox (Vulpes vulpes montanus).
4 Himalayan Bears (Ursus tibetanus).

1 Indian Rhinoceros & (Rhinoceros unicornis).

1 Kiang ? (Equus kiang).

I Zebu ? (Bos indicus).

1 Indian Antelope ? (Antilope cervicapra).

1 Four-horned Antelope & (Tetraceros quadricornis).

2 Nylghaies 3 ? (Boselaphus tragocamelus).

1 Butia Goat (Capra hircus).

1 Tahr ? (Hemitragus jemlaicus).

1 Burrhel Sheep & (Ovis nahura).

1 One-horned Ram (Ovis aries).

1 Hunia Ram (Ovis aries).

4 Barwal Rams (Ovis aries).

1 Musk Deer (Moschus moschiferus).

1 Indian Muntjac & (Cervulus muntjac) (albino).

1 Wallich's Deer (Cervus wallichii) 8.

2 Sambur Deer 3 ? (Cervus aristotelis).

2 Barasingha Deer 3 ? (Cervus duvaucelli).

1 Axis Deer (Cervus axis).

3 Hog Deer (Cervus porcinus).

Aves.

2 Orange-headed Ground Thrushes (Geocichla citrina).

2 Indian Dial-birds (Copsychus saularis).

1 Ringed-necked Parrakeet (Palcornis torquata).

1 Banded Parrakeet (Palcornis fasciata).

1 Golden Eagle (Aquila chrysaëtus).

2 Wedge-tailed Fruit-Pigeons (Sphenocercus sphenurus).

1 Chukar Partridge (Caccabis chukar).

2 Cheer Pheasants (Catreus wallichii).

2 Black-backed Kaleege Pheasants (Gennœus melanonotus).

2 Himalayan Monauls (Lophophorus impeyanus).

1 Common Peafowl (Pavo cristatus).

As was also announced in the Report for 1911, the Government of the Federated Malay States offered to the Society, in the end of 1911, and the Council gratefully accepted, a collection of the remarkable and interesting fauna of the Malay States, on the condition that it should be transported to London by the Society and exhibited as a special collection during the season of 1912. A keeper was sent to Port Swettenham to take charge of the animals on the voyage to London, and the collection arrived in the Thames on June 23rd, by the S.S. Machaon, later than had been expected, as on account of the dock strike, the vessel had to be sent first to Rotterdam and then to Antwerp. The Society, besides its great indebtedness to the Government of the Federated Malay States owes special thanks to Mr. H. C. Robinson, C.M.Z.S., Director of the Federal Malay States Museum at Kuala Lampur, who received and forwarded the animals.

LIST OF MALAYAN ANIMALS EXHIBITED AS A SPECIAL COLLECTION, 1912.

Mammalia.

Presented by the Goverment of the Federated Malay States.

- 1 Siamang (Symphalangus syndactylus) ².
- 11 Pig-tailed Macaques (Macacus nemestrinus) 53, 69.
 - 2 Slow Lories (Nycticebus tardigradus).
 - 1 Tiger (Felis tigris) ?.
 - 1 Clouded Tiger (Felis nebulosa) 8.
 - 1 Large Indian Civet (Viverra zibetha) 3.
 - 2 Malayan Palm-Civets (Paradoxurus hermaphroditus) 5 9.

*1 Short-tailed Mongoose (Mungos brachyurus) 8.

- 1 Bicoloured Squirrel (Ratufa bicolor) 9.
- 2 Banded Squirrels (Sciurus vittatus) 3 ?.
- 2 Long-tailed Porcupines (Hystrix longicauda).
- 1 Indian Elephant (*Elephas indicus*) ^{\circ}.
- 2 Sambur Deer (Cervus aristotelis) & 9.
- 4 Javan Chevrotains (Tragulus javanicus).

By MR. D. HAMPSHIRE.

1 White-handed Gibbon (Hylobates lar).

By Mr. E. L. HUSON.

Binturong (Arctictis binturong)³.
 By MR. H. H. BANKS.
 Malayan Bear (Ursus malayanus)⁹.
 By MR. MUNGO PARK.
 Malayan Fruit-Bat (Pteropus malaccensis)³.
 By YAP LONG CHIN.
 Long-tailed Porcupine (Hystrix longicauda).

Aves.

By the GOVERNMENT OF THE FEDERATED MALAY STATES.

- 19 Blue-crowned Hanging Parrakeets (Loriculus galgulus).
 - 1 Malayan Fish-Owl (Ketupa javanensis).
 - 4 Japanese Teal (Nettium formosum) & & & ? ?.
 - 1 Parrot Fruit-Pigeon (Osmotreron vernans) ?.
 - 1 Tigrine Turtle-Dove (Turtur tigrinus).
 - 1 Barred Dove (Geopelia striata).
 - 8 Green-winged Doves (Chalcophaps indica).
- *10 Charlton's Tree Partridges (Arboricola charltoni).
 - 2 Long-billed Francolins (Rhizothera longirostris).
 - 2 Javan Peafowl (Pavo muticus) & 9.
 - *1 Water-Cock (Gallicrex cinerea).
 - 2 Red Jungle-fowl (Gallus gallus) 3 2.

By Mr. MUNGO PARK.

- 3 Crested Wood Partridges (Rollulus roulroul).
- 2 Rufous-tailed Fireback Pheasants (Acomus erythrophthalmus) 8 9.

By MR. A. L. JARVIS.

- 2 Argus Pheasants (Argusianus argus) 8 %.
- 1 Crested Peacock-Pheasant (Polyplectrum malaccense) ?.
- 2 Rufous-tailed Fireback Pheasants (Acomus erythrophthalmus) & ?.

By MR. E. J. GLEESON.

2 Red Jungle-fowl (Gallus gallus) 3 2.

Reptilia.

By the GOVERNMENT OF THE FEDERATED MALAY STATES.

- 1 Porose Crocodile (Crocodilus porosus).
- 4 Amboina Box-Tortoises (Cyclemys amboinensis).
- 3 Oldham's Terrapins (Cyclemys dhor).
- 2 Spinose Land-Emys (Geomyda spinosa).
- 4 Phayre's Tortoises (Testudo emys).

*2 Elephant-Snakes (Acrochordus javanicus). *1 Bowring's Gecko (Hemidactylus bowringii). *1 Bridled Gecko (Hemidactylus frenatus). *1 Leschenault's Gecko (Hemidactylus leschenaultii). By H. H. The SULTAN OF PERAK. 6 Baska Water-Tortoises (Batagur baska). By Mrs. TATE. 1 Reticulated Python (Python reticulatus). *New to the Collection.

NEW WORKS AND REPAIRS.

GENERAL.

The footpaths have been repaired and tarred and a large number of minor works carried out throughout the Gardens.

NORTH GARDEN.

NEW BRUSH TURKEYS' ENCLOSURE.-The sloping bank at the western end of this strip of the Gardens has been enclosed with a high wire fence to form a new enclosure for the Brush Turkeys.

PHEASANTRY.-The runs attached to a block of sheds between the Lemur House and Northern Pheasantry have been wired, and the sheds themselves cleaned, repaired and limewashed to provide additional accommodation for the Society's fine stock of Pheasants.

THE OWLS' CAGES have been repaired, and the floors of the outer flights cemented and drained.

CRANES' PADDOCKS .- Much of the wire-work of the Cranes' enclosures has been renewed.

THE GARDENERS' DEPARTMENT has been removed to a site at the eastern end of this garden, new greenhouses, frames, and a modern heating plant being installed.

THE MOUSE HOUSE has been thoroughly repaired and painted and adapted for the Shoe-bill.

MIDDLE GARDEN.

ZEBRA, GIRAFFE AND HIPPOPOTAMUS HOUSES .- The heating apparatus at the Zebra, Giraffe and Hippopotamus houses has been overhauled, and the pipes re-arranged with a view to greater efficiency, and all external wood and ironwork have been painted.

THE NEW BRIDGE over the Canal has been painted.

THE HYRAX CAGES AND BEAVERS' POND.-The Hyrax cages have been rewired and considerably enlarged, the Beavers' enclosure divided with a strong fence, and a new roof with a door formed to the shelter.

PUMPING STATION.-The gas-engine which works the pump from the well has been thoroughly repaired, and several important parts renewed.

SOUTH GARDEN.

THE OLD PROSECTORIAL BUILDINGS, THE GREEN-HOUSES, AND THE SWINE AND RODENTS SHEDS were cleared away, and on the site temporary buildings and enclosures were erected for the housing of the King's Nepal Collection and the Malay States Collection.

NEW SWINE SHEDS.—New sheds and runs for the swine have been formed in one of the Park Paddocks.

THE MONKEY HOUSE has been thoroughly repaired and painted externally.

THE GREAT AVIARY.—The wire-work of this has been repaired and painted, an arrangement of small-mesh wirenetting and curved zinc formed around the outside to exclude rats; some of the old ponds which were unnecessary have been filled up, and the ground considerably raised.

THE WADERS' AVIARY has been entirely re-wired, and additional supports formed to the roof.

FELLOWS' TEA PAVILION. - The space in front of this has been considerably enlarged by throwing back the fence, thus giving much more space to the Fellows and their friends on crowded days.

KITES' AVIARY.—The floors of the outer flights have been cemented and drained.

DIVING BIRDS' HOUSE.—The old heating boiler being worn out, a new one of more modern type has been installed.

THE SUMMER AVIARY.—A new aviary formed of smallmesh wire-netting has been erected on the site of the old paddocks situated at the western end of the Ostrich House. Numbers of birds nested there successfully

during the past summer, many belonging to species which had never before bred in the Gardens.

STORK AND OSTRICH HOUSE.—Most of the floors in this house being defective, were taken up and re-laid with wood blocks on concrete.

LION HOUSE.—All the dens have been cleaned and painted with special enamel paint, and new sleepingplatforms have been formed throughout. SMALL BIRDS' HOUSE.—Sun-blinds have been made to fix over all the sky-lights in hot weather.

SEA LION POND.—The fence has been cleaned and tarvarnished, and the wire on the lower portion renewed.

GNUS' PADDOCK.—This paddock has been divided into four paddocks with strong fences, and a walk with floral borders formed down the centre connecting with a sidedoor of the Antelope House.

APE HOUSE.—The wire-work of one of the large cages has been replaced by strong iron bars.

WESTERN AVIARY.—The wire fronts of the compartments at the east end of this aviary have been renewed.

THREE ISLAND POND.—The drain from this pond, being defective, has been re-laid.

REMOVAL OF THE DUNG POUND.—This unsightly but necessary erection was removed from the old site and reerected in a less conspicuous position, being effectually screened from the Gardens by a high wall, and from the roadway by a lattice fence and privet hedge. The expense of this alteration was very generously defrayed by the President.

GARDENING DEPARTMENT.—Under the capable superintendence of Mr. John Young, the Society's Head Gardener, the floral decoration of the Gardens has maintained its high character. Although some of the existing flowerbeds had to be occupied for other purposes, a large number of new beds were made, and the provision of narrow floral borders surrounding the enclosures was greatly increased, with the double object of adding to the beauty of the Gardens, and keeping visitors from too close an approach to railings guarding horned animals. Many parts of the Gardens formerly occupied by unsightly bushes were cleared and planted with flowers, so that the number of bedding-out plants and the area occupied by them was made larger that it has ever been before.

Mr. Lewis Medland, F.Z.S., kindly presented a large collection of plants for bedding-out.

The new greenhouses have proved most satisfactory.

NEW WORKS IN PROGRESS.

THE MAPPIN TERRACES.

The Council has pleasure in announcing that it accepted the munificent offer made by Mr. J. Newton Mappin, the head of the firm of Mappin & Webb., Ltd., as conveyed to the Secretary in the following letter :—

158-162, Oxford Street, W. December 14th, 1912.

Dear Dr. CHALMERS MITCHELL,

I have pleasure in asking you to inform the Council that I offer to present to the Society an installation for the panoramic display of wild animals as nearly as possible on the lines of the sketches and plans you showed me. I believe that such an installation would be of great benefit to the community, and would be an important step in your successful efforts to make the London Zoological Gardens the best in the world from the point of view of the animals themselves and the visitors.

If my offer be accepted it would be very agreeable to me if the Council were to arrange that it be associated with some special benefit to London shop assistants, as for instance, that they be admitted to the Gardens at the rate of sixpence instead of a shilling on an afternoon each week convenient to them.

On hearing from you that the Council has accepted my proposal and undertakes to proceed with the installation of the panorama immediately, and to complete it within twelve months, I shall have much pleasure in defraying the cost of the work as it proceeds, and will arrange with my bankers for them to pay from time to time on certificates signed by you and the architects. I do not wish the cost of the installation to be made known, but you and Mr. Joass know the limit to which I am prepared to go. I propose to leave the details to your experience so far as the arrangements for the animals go, and to Mr. Joass with regard to architectural work; but I assume that the scheme will be carried out on the general lines of the sketches you showed me, except that I should prefer that money should not be spent on the tea-pavilion until the best possible provision has been made for the animals.

Yours very truly, (Signed) J. NEWTON MAPPIN.

B

The Council desire to associate Mr. Mappin's name with this great gift and propose to call the installation "The Mappin Terraces." They hope also to devise a convenient way of complying with Mr. Mappin's wish regarding the assistants in London shops.

For some time the Council had wished to develop on permanent lines the site temporarily occupied last summer by the Nepal and Malay Collections, but had been prevented by lack of funds. A beginning was made some years ago by the removal of the Prosectorial Department to new quarters at the Reptile House. Last year the Gardeners' Department was removed to the north bank of the canal, the cost being defrayed out of the special Garden Improvement Fund. A very generous donation from the President made it possible to complete clearing the ground.

The Mappin Terraces will occupy an area shaped like the quadrant of a circle with a tea-pavilion opening on to a wide terrace for visitors on the low ground at the apex, so as to afford a general view of the successive tiers of enclosures for animals. The outermost and highest portion will be formed by a crescent-shaped curve of rockwork rising into four peaks, and suitable for goats, sheep and chamois. At the foot of this there will be a terrace for visitors, giving on the one side a near view of the goat-hills, and on the other a view from above, through openings in the masonry, of the lower crescent for bears. For the bears six large enclosures are provided, each containing a pond, rock-work and shelter caves, and separated from the second terrace for visitors by a deep ditch across which the animals will be visible without the intervention of bars. Below the bears' dens will be placed four large paddocks for ruminants such as deer, and a large pond and lawn. These also will be visible to visitors on the upper terraces as well as from the tea terrace below.

The rock-work is to be constructed of ferro-concrete, and the hollow interior, in addition to the accommodation for animals, will provide space for many of the service departments scattered through the Gardens.

The hills will be modelled to represent natural scenery; the enclosures for bears and ruminants and the two high terraces for visitors will represent massive Roman architecture such as might have been constructed on the side of a hill; the lower and more formal portions, the steps giving access to the terraces, and the tea-pavilion will recall Italian renaissance designs. The actual designs approved by Mr. Mappin were prepared by Messrs. John Belcher, R.A., and J. J. Joass from rough sketch plans supplied by the Secretary.

The orientation of the terraces will afford the public in Regent's Park a full although distant view of the animals, but the site and dimensions have been arranged so that even in winter, when there is no foliage, it is doubtful if even the extreme tops of the rock-work will be visible from any of the residential houses in the neighbourhood.

THE CAIRD INSECT HOUSE.

The Council have also the great pleasure to announce that they have accepted the generous offer by Sir James Key Caird, Bt., conveyed in the following letter to the Secretary :—

ROSEANGLE,

DUNDEE,

December 23rd, 1912.

в 2

It is with much pleasure that I enclose $\pounds 1,000$, and beg of you to use it in building an additional Insecthouse in the Zoological Gardens.

If you let this be known it may encourage others to have improved houses such as you explained to me, having shaded passages.

I am, Yours very truly,

(Signed) J. K. CAIRD.

The Insect House will be constructed on the site now occupied by the Thar's enclosure, and will consist of an oblong building with a central shaded passage for visitors, and on each side a row of cases or tanks for terrestrial and aquatic insects, illuminated from above as in an aquarium.

New House for SMALL MAMMALS. The Council have arranged to proceed with the erection of a new house for small mammals on the site hitherto occupied by the Brush-Turkey's enclosure. It will be constructed on the same plan as the Caird Insect-house, but will have numerous outside cages.

NEW LAVATORIES.

The lavatory accommodation is still defective, and it has been arranged to construct new lavatories for ladies and gentlemen, both in connection with the Caird Insect House and the Mappin Terraces.

REFRESHMENT DEPARTMENT.

As explained in the Report for 1911, the agreement with Messrs. Spiers and Pond ended on Dec. 31, 1912, and Mr. D. Ridley, of Sandown Park, was given a contract for the catering at the Gardens, of one year's duration. The valuation of the plant and fixtures was completed before the end of the year, and the transference to the new management was made without any break. The terms of the contract leave the Society with very full control, and every effort is to be made to improve the catering.

A full license has been granted to the Society on the condition that no spirits are sold after sunset, or anywhere except with meals in the main Refreshment Rooms, or to the Keepers and Employees.

STAFF AT THE GARDENS.

The following Table shows the staff (Menagerie) as it existed at December 31st, 1912 :--

Superintendent and Curator of Mammals.

Inspector of Works and Curator of Birds.

Curator of Reptiles.

Prosector.

Pathologist.

Assistant Superintendent.

Trouble to all a

10 Head Keepers of the following Sections (distinguished by gold badges).

Apes and Monkeys. Large Carnivora. Small Mammals. Ungulates in South Garden. Elephants and Rhinoceroses. Giraffes, Tapirs and Hippos. Equine Animals. Water-Fowl. Ostriches, Cranes, and Game birds. Parrots and Birds of Prey. Mr. E. G. Boulenger, F.Z.S., who was appointed Curator of Reptiles in June, 1911, on a year's trial, was placed on the permanent staff.

There was one change in the list of Head-keepers. W. Sutton of the Small Bird's Department, being made a Gate-keeper in place of G. Perkins, retired on a pension. J. Bailey, Junior Keeper, was appointed a Senior Keeper with the duties of Head Keeper of Small Birds.

5 Senior Keepers (distinguished by silver badges).

23 Junior Keepers (distinguished by green badges).

29 Helpers.1 Stableman.1 Storekeeper.

1 Assistant Storekeeper.

- 1 Engine-driver.
- 2 Butchers.

- 1 Dungman.
- 2 Stokers.
- 2 Night-Watchmen.
- 3 Gate-keepers.
- 1 Time-keeper.
- 1 Housekeeper.

Works.

Clerk of the Works.
 Carpenters.
 Bricklayer.
 Smith.

- 2 Wireworkers.
- 1 Networker.
- 4 Painters (average).
- 11 Labourers.

The permanent staff, reduced in 1907, has been kept as low as possible, additional men being taken on for special jobs as required.

Gardens.

Head Gardener.
 Propagator.
 Assistant Propagator.

14 Garden Labourers.1 Boy.

Prosectorium.

1 Assistant. 2 Boys.

VISITORS.

The total number of visitors to the Gardens, during the past year, was 1,012,898, an increase of 120,276 as compared with the total for the previous year, and an increase of 97,134 over that of the previous highest total recorded in 1876. To commemorate the occasion, a free admission for 1913 was granted to Mr. C. P. Raikes, of Boscombe, Watford, who was the millionth visitor to pass through the turnstiles in the year.

The satisfactory increase of visitors was due partly to the interest in H.M. the King's Nepal Collection, and the Malay Collection presented by the Government of the Federated Malay States; but it is hoped that it is also caused by the greater attractiveness of the Gardens. The appended table shows that the increase was spread over every important class of visitors. It was greatest in the case of those paying the shilling rate, but far more green tickets were also used, and the numbers of children from rate-aided schools, which had fallen off in 1911, surpassed the level of 1910.

The following table summarises the different classes of visitors to the Gardens during the past two years :---

NUMBER OF VISITORS ON SUNDAYS.

In the Report for 1911 the Council called attention to the continuous increase in the number of visitors on Sundays. In the year 1911, although there was a decrease in the total number of visitors for the year as compared with 1910, there was an increase of 4,843 in the Sunday visitors. In 1912 the increase in the numbers of Sunday visitors over 1911 was 20,578, and in that of week-day visitors 99,698, so that the attendance on Sundays is increasing very rapidly both absolutely and relatively to the total increase. Fellows themselves naturally select fine Sundays for their visits, and, as most of the Sunday tickets are undated, the same course is taken by others, with the result that the pressure on Sunday afternoons in good weather continues to increase. The Council regard it as urgent in the interests of the Society to try to meet this position, and with this object have made changes in the tickets described on p. 41 under the heading "Fellows' Tickets."

NUMBER OF VISITORS ON BANK HOLIDAYS.

The total number of visitors admitted upon the three

principal Bank-Holidays in 1912 amounted to 114,950, an increase of 19,490 as compared with the corresponding holidays of the previous year.

Fellows' Tickets.

There has been some misapprehension amongst Fellows as to the changes in the ticket regulations which came into force for the year 1913. It is the duty of the Council to regulate the personal access of Fellows to the Gardens, but such regulations and restrictions are subject to the approval of a General Meeting. It is also the duty of the Council to regulate the privileges of Fellows as to introducing visitors either personally or by signed orders, but this latter duty is not subject to the approval of a General Meeting. For some time the crowded state of the Gardens has been engaging the attention of the Council, and suggestions of the most diverse character have been made by various Fellows. The Council became convinced, however, that the value of Sunday privileges was being diminished to an extent that seriously affected the Society, as the day specially reserved for subscribers and their friends was becoming one of the least pleasant on which to see the animals. The chief cause was the increasing use of green tickets on Sundays.

As there were considerably over half a million outstanding but still valid green tickets in the hands of Fellows, the Council first considered the possibility of declaring these invalid after due warning had been given. As stated in the Report for 1911, however, it was decided that it would be impracticable to do this, but that, as a preliminary step, tickets issued for 1913 and subsequent years would be valid only for the year of issue. As the pressure is comparatively slight in the winter months, two months' grace was given, and the tickets of this year now bear the imprint that they will be valid until February 28th of the following year.

Further steps were considered, and it was decided to cancel the permission to take twenty green tickets in lieu of the Saturday Order-book, and that Fellows in future would be able to obtain ;-twenty green tickets ; a Sunday Order-book, or a second twenty green tickets in lieu of that book; and a Saturday Order-book, or twenty white tickets not valid on Sundays, in lieu of that book. For the convenience of Fellows these tickets were all perforated, so that each could be used for one adult or for two children.

The new regulations were announced and discussed at the General Meeting of the Society in June, 1912, and were explained in a circular issued on December 28th, 1912, with the supply of tickets for 1913.

The actual numbers posted on Dec. 28 were as follows :--

Saturday Order-books	208
Sunday Order-books	1,213
Green Cards (valid on Sundays or Week-	
days)	151,680
White Cards (valid only on Week-days)'	82,600

Most Fellows have accepted the change without comment; a certain number have written warmly approving it; a few have urged that green tickets should be abolished completely; a certain number wrote complaining of the limitation of their privilege, but accepted the explanation; a few have protested vigorously and two have resigned. The Council have no object in making changes except to consult what appears to be the general interest of the Society, and trust that those Fellows who dislike the numerical reduction of their privileges will remember that the Fellowship will cease to be attractive and green tickets will cease to be worth giving away, unless visits to the Gardens on Sundays are more pleasant than on week-days.

EXCURSION AND SCHOOL TICKETS.

ADULTS.

25 to 50 @ 10d. each. 51 to 100 @ 9d. each. 101 to 250 @ 8d. each. 251 to 500 @ 7d. each. 501 and upwards @ 6d. each. CHILDREN UNDER 12 YEARS. 50 to 100 @ 5d. each. 101 to 250 @ 4d. each. 251 and upwards @ 3d. each. If the date fixed for the proposed visit to the Gardens should be found, through unforeseen circumstances, unsuitable, the tickets, upon being returned to the Office, may be endorsed for another day during the year of issue.

Special packets of School Excursion Tickets for the admission of 25 School Children (under 14 years of age) and one Teacher, may also be obtained for any fixed date (except Sunday) at the Society's Offices, at the reduced price of eleven shillings per packet.

Combined Admission and Tea Tickets can be obtained for 25 persons and upwards at the rate of 1/6 each for adults, and 1/- for children.

CHEAP ORDERS for the admission of any number from 25 upwards of the children of Council or Grant-aided Schools to the Society's Gardens may be had undated, for any day between the hours of 9.0 a.m. and 1.0 p.m. except Saturdays, Sundays and Mondays. The charge for an order to admit 25 Children with one or two Teachers is 3s., for an order for 50 Children with 2 Teachers 5s., and additional admissions may be obtained at the rate of Children 1d. each, Teachers 5d. each.

All applications for Tickets must be made to the Secretary at the Offices of the Society. Payment for admission at the reduced prices cannot be accepted at the turnstiles.

MOTOR SERVICE TO THE GARDENS.

The Council call the attention of Fellows to the Motor Bus Service (No. 74) which calls at the North Gate of the Gardens at intervals of five minutes, and connects with Camden Town, St. John's Wood Station, Paddington, Bayswater, Hammersmith and Barnes.

MENAGERIE.

Provisions.

The commissariat at the Gardens is of considerable interest. The following table gives the chief items of expenditure paid in 1911 and 1912:—

GENERAL CONDITION OF THE ANIMALS.

The general health of the collection has been good, and there have been notable decreases in the deaths due to tubercle and other communicable diseases. The Garden Committee and the staff have received much assistance from the Society's Pathologist and from Professor G. H. Wooldridge, Hon. Consulting Veterinary Surgeon, and Mr. B. Gorton, the Acting Veterinary Surgeon.

46

The outbreaks of Foot-and-mouth Disease in this country were the occasion of much anxiety. Very special attention was given daily to all the animals in the Gardens that might be subject to that disease; disinfectants were used freely at all the entrances, and care was taken to ascertain that the food-supply came only from localities known to be unaffected. Fortunately, there was no case that incurred even suspicion.

47

List of Animals bred in the Gardens in 1912.

Notwithstanding the cold and rainy weather of 1912 and the perennial difficulty of breeding and rearing animals in a menagerie limited in area and used chiefly for exhibition, more mammals and birds were reared in 1912 than in 1911, a result that may be attributed to the increasing care that is given to the animals.

Mammals.

April	7.	1 Capped Langur (Semnopithecus pileatus),
		living; reared by mother.
		(First record of breeding in captivity.)
June	5.	1 Sooty Mangabey (Cercocebus fuliginosus),
		died directly after birth.
March	3.	1 Guinea Baboon (Papio sphinx), stillborn.
April	10.	1 Ibean Baboon (Papio ibeanus), stillborn.
		1 Ring-tailed Lemur (Lemur catta), died
		(5 days old); left with mother.
May	1.	
		sold.
Nov.	15.	2 Leopards (Felis pardus), eaten by mother
		a week after birth.
Feb.	19.	2 Jaguars (Felis onca), 1 died (5 weeks old),
		1 died (6 weeks old); left with mother.
July	13.	1 Puma (Felis concolor), died a day after
		birth; left with mother.
Jan.	18.	2 Caracals (Felis caracal), 1 died (8 days

Dec.	19.	4 Cairo Spiny Mice (Acomys cahirinus),
A	01	living.
Aug.	21.	6 Coypus (Myocastor coypus), 4 disposed of
т	10	in exchange, 2 living.
June	13.	1 Hybrid Somali and Common Ass & (Equus
		somaliensis \times E. asinus), living; reared
т 1	00	by mother.
July	23.	1 Grévy's Zebra & (Equus grevyi), very
		weak at birth, died (4 days old); left
M I		with mother.
March	4.	1 English Park Bull (Bos taurus), killed and
16	0.0	used for food.

48

May 30. 1 English Park Cow (Bos taurus), living; reared by mother. Oct. 26. 1 English Park Bull (Bos taurus), living; reared by mother. July 14. 1 American Bison & (Bison americanus), living; reared by mother. May 24. 1 Springbuck ? (Antidorcas marsupialis), living; reared by mother. 12. 1 Indian Antelope ? (Antilope cervicapra) Dec. died (4 days old).

1.15

April	2.	1 Eland & (<i>Taurotragus oryx</i>), living; reared by mother.
April	7.	1 Eland ? (<i>Taurotragus oryx</i>), living; reared by mother.
May	26.	1 Grecian Ibex & (Capra ægagrus), living; reared by mother.
June	9.	1 Hybrid Caucasian and Himalayan Ibex (Capra cylindricornis × C. sibirica), died (8 days old).
June	18.	1 Hybrid Caucasian and Himalayan Ibex (Capra cylindricornis \times C. sibirica), died 2 days after birth.
July	6.	1 Hybrid Caucasian and Himalayan Ibex ? (Capra cylindricornis × C. sibirica), living; reared by mother.
Aug.	4.	
Aug.	19.	1 Tahr. ? (<i>Hemitragus jemlaicus</i>), living; reared by mother.
Mar.	14.	1 African Sheep ? (Ovis aries), disposed of in exchange.
May	21.	1 Barbary Sheep & (Ammotragus lervia), sold.
April	15.	1 Mouflon & (Ovis musimon), living.
June	6.	1 Dybowski's Deer (Cervus hortulorum), living; reared by mother.
Sept.	28.	1 Barasingha Deer & (Cervus duvaucelli), living; reared by mother.
April	12.	1 Common Camel ? (Camelus dromedarius), disposed of in exchange.
Feb	11	1 Plack Wallense (15

robustus), w allaroo (Macropus reo. **TT**. DIACK living; reared by mother. Oct. 31. 1 Black Wallaroo (Macropus robustus), living; reared by mother. Jan. 12. 1 Red-bellied Wallaby (Macrcpus billardieri), living; reared by mother. July 11. 1 Red-bellied Wallaby (Macropus billardieri), living; reared by mother. April 10. Tree - Kangaroo 1 Ursine (Dendrolagus ursinus), died (9 weeks old). Mar. 1 Rufous Rat - Kangaroo 21. (Æpyprymnus rufescens), living; reared by mother.

Birds.

The following birds were successfully reared except where otherwise stated. An asterisk denotes that the species has not previously bred in the Gardens.

June	1 1	Grey-winged Ouzels (Merula boulboul).
Aug.	1	
June	3	White-throated Ground-Thrushes (Geocichla
Aug.	1	cyanotis)*.
June.	2	Scarlet Tanagers (Ramphocælus brasilius)*, (not
o ano.		reared).
Aug.	1	Magpie Tanager (Cissopis leveriana)*, died after leaving the nest.
Aug.	3	Crimson Finches (Neochmia phaëton)*.
July.	3	Mexican Rose-Finches (Carpodacus mexicanus)*.
July.	2	Yellow-collared Parrakeets (Barnardius semi-
oury.	~	torquatus).
May	1	
~	{ 20	Budgerigars (Melopsittacus undulatus).
Sept.	, 5	White Storks (Ciconia alba), not reared.
May.	0	Black-necked Swans (Cygnus nigricollis), one
April.	2	died when three weeks old.
Sept.	13	Muscovy Ducks (Cairina moschata).
June.		Carolina Ducks (Lampronessa sponsa).
May.		Upland Geese (Chloephaga magellanica).
May	1	
Sept.	{ 6	Egyptian Geese (Alopochen ægyptiacus).
June.	1	Hybrid Orinoco and Egyptian Goose (Alop-
o uno.	-	ochen jubatus × A. ægyptiacus).
May.	4	Variegated Sheldrakes (Tadorna variegata),
may.	-	1 killed by cat.
May.	6	Wild Ducks (Anas boscas).
June.		Wigeon (Mareca penelope).
1 'I		Chastnest broasted Tool (Nottium castaneum)

- July. 5 Chesthut-breasted Year (Ivertium custanteum). 6 Brazilian Teal (Nettium brasiliensis), 5 died when a few days old.
- Aug. 2 Shovellers (Spatula clypeata).
- June. 20 Tufted Ducks (*Fuligula fuligula*), hatched from eggs presented by Fellows of the Society, 3 died.
- July. 1 Eider Duck (Somateria mollissima), hatched from egg presented by a Fellow of the Society.
- April. 5 Senegal Turtle-Doves (Turtur senegalensis).

1. 19

July Aug.	3 Scaly Ground Doves (Scardafella squamosa)*.
June Aug.	3 Bronze-winged Pigeons (Phaps chalcoptera).
June July.	4 White-fronted Doves (Leptoptila jamaicensis)*.
July Sept.	4 Venezuelan Ground Doves (Geotrygon venezue- lensis).
Sept.	12 Black-breasted Colins (Colinus pectoralis)*, 2 died.
Sept.	2 Black-throated Crested Quails (Eupsychortyx nigrigularis).
July Aug.	12 Californian Quails (Callipepla californica).
Aug.	6 Douglas Quail (Lophortyx douglasi)*.
July.	1 Reeve's Pheasant (Syrmaticus recresi).
Sept.	5 Elliot's Pheasants (Calophasis ellioti).
July.	6 Gold Pheasants (Chrysolophus picta).
July.	14 Amherst Pheasants (Chrysolophus amherstiæ), 3 died.
July.	1 Swinhoe's Pheasant (Genænus swinhoii).
May.	7 Sonnerat's Jungle-fowl (Gallus sonnerati), 4 died.
May.	7 Red Jungle-fowl (Gallus gallus), 2 died.
Sept.	6 Horned Tragopans (Ceriornis satyra), 3 died.
Sept.	9 Black-winged Peafowl (Paro nigripennis).
$\left. \begin{array}{c} \operatorname{April} \\ \operatorname{June} \\ \operatorname{Aug.} \end{array} \right\}$	11 Peacock Pheasants (Polyplectrum chinquis), 2 died.
May.	11 North-American Turkeys (Meleagris ameri-

cana), 1 died. 2 Earl's Weka Rails (Ocydromus earli)*, 1 died. June. May. 6 Black-tailed Waterhens (Microtribonyx ventralis). 2 Brazilian Cariamas (Cariama cristata), both June. died. June 4 Greater Black-backed Gulls (Larus marinus). July. 4 Herring Gulls (Larus argentatus). July. 1 Hemprich's Gull (Larus hemprichi)*. July.

June July	10	Rufous Tinamous (Rhynchotus rufescens), 4 die	d.
Ang.			

June. 4 Martineta Tinamous (Calodromus elegans).

April. 1 Black-footed Penguin (Spheniscus demersus).

Reptiles and Batrachians.

Sept.	12	Mocassin	Snakes	(Tropidonotus	fasciatus	var,
L		rhombi	fer), all li	ving.		

- June. 12 Russell's Vipers (Vipera russelli), all dead.
- Sept. 3 Western Diamond Rattlesnakes (Crotalus atrox), 1 living.
- Jan. 16 Spotted Salamanders (Salamandra maculosa), all dead.
- Feb. 10 Spotted Salamanders (Salamandra maculosa), all dead.
- Aug. 2 Crested Newts (Molge cristata var. karelinii), 1 living.
- Dec. 11 Axolotls (Amblystoma tigrinum), all living.

Additions to the Menagerie in 1912.

The number of Vertebrate Animals living in the Society's Menagerie at the end of 1912 was 3,595. The corresponding number on the 31st of December, 1911, was 3,847, as will be seen by the following Table :--

	December 31.	
	1911.	1912.
Iammals	885 2,180 594 188*	826 2,162 486 121
_	3,847	3,595

*This does not include a Collection of about 100 "Millions " Fishes.

The total number of registered additions to the Menagerie in 1912 was 2,817, of which 1,335 were acquired by presentation, 456 by purchase, 448 were born in the Gardens, 346 were received on deposit, and 232 obtained in exchange.

	Presented.	Purchased.	Born.	Deposited.	Received in Exchange.	Total.

The mode in which these figures compare with those of the previous ten years is shown in the following table :---

In addition to the following list of the more noteworthy additions to the Menagerie in 1912, special attention may be directed to the King's Nepal Collection, a full list of which is given on page 26, and to the Malay Collection presented by the Government of the Federated Malay States, a full list of which is given on page 28.

White-throated Capuchin (Cebus hypoleucus), from Panama, presented by Francis Wright, Esq., on Jan. 31st.

2 Grand Galagos (Galago crassicaudata) and 1 Blotched Genet (Genetta tigrina), from the Transvaal, presented by Commander F. J. Moseley on Jan. 20th.

1 African Red-winged Starling (Amydrus morio), from S. Africa, new to the Collection, received in exchange on Jan. 3rd.

1 Yellow-rumped Hangnest (Pseudoleistes guirahuro), from S. America, new to the collection, presented by Miss V. Bromwich on Jan. 22nd.

1 Yellow-lored Amazon (Chrysotis xantholora), from Paraguay, purchased on Jan. 4th.

Blue-rumped Parrakeets (Psittinus incertus), from Malacca, received in exchange on Jan. 3rd.

Abyssinian Love-bird (Agapornis taranta), new to the Collection, deposited on Jan. 3rd.

1 Calabar Snake (Calabaria reinhardti), from W. Africa, new to the Collection, presented by S. H. Carnelley. Esq., on Jan. 16th.

1 Schott's Snake (Philodryas schotti), from S. America, new to the Collection, received in exchange on Jan. 18th. 2 Snow-Leopards (Felis uncia), from Kashmir, presented by Captain G. Douglas Oliver, F.Z.S., on Feb. 26th.

2 Jaguars (Felis onca), born in the Menagerie on Feb. 20th.

2 Striped Hyænas (Hyæna hyæna), from N. Nigeria, presented by H. P. Lobb, Esq., on Feb. 4th.

1 Spurrell's Dormouse (Graphiurus spurrelli), from Dunkwa, Gold Coast, new to the Collection, presented by Dr. H. G. F. Spurrell, F.Z.S., on Feb. 12th.

1 White-capped Redstart (Chimarrhornis leucocephalus), from the Himalayas, presented by Alfred Ezra, Esq., F.Z.S., on Feb. 29th.

1 Alpaca (Lama pacos) 3, from Peru, received in exchange on March 5th.

1 Racket-tailed Drongo (Dissemurus paradiseus), from India, presented by Alfred Ezra, Esq., F.Z.S., on March 14th.

1 African Tantalus (Pseudotantalus ibis), from Southern Nigeria, presented by Sir Walter Egerton, K.C.M.G., F.Z.S., on March 15th.

1 Ashy-headed Goose (Chloëphaga poliocephala), bred in Holland, received in exchange on March 22nd.

3 Prairie-Hens (Tympanuchus americanus), from North America, received in exchange on March 21st.

1 Rüppell's Guereza (Colobus abyssinicus occidentalis) 3, from the Southern Cameroons, deposited on April 29th.

1 Black Jaguar (Felis onca) 9, from Para, purchased on April 12th.

1 Capped Langur (Semnopithecus pileatus), 2 Elands (Taurotragus oryx), 1 Common Camel (Camelus dromedarius), and 1 Ursine Tree-Kangaroo (Dendrolagus ursinus), born in the Menagerie.

A collection of birds from Columbia, presented by W. K. Pomeroy, Esq., F.Z.S., on April 6th, containing amongst others, 2 Purple Jays (Cyanocorax affinis), new to the Collection, 1 Harpy Eagle (Thrasaëtus harpygia), 2 Severe Macaws (Ara severa), and 2 Golden Hangnests (Icterus xanthornus).

barbatus), from Russian 2 Lammergeiers (Gypaëtus Turkestan, purchased on April 19th. 1 large Reticulated Python (Python reticulatus), from the East Indies, presented by the late Rowland Ward, Esq., F.Z.S., on April 19th.

A pair of European Bison (Bison bonasus) from Russia, presented by H.G. the Duke of Bedford, K.G., on May 15th. 1 Black Leopard (Felis pardus), from Assam, purchased on

May 21st.

1 Branded Palm-Civet (Arctogalidia stigmatica), from Sarawak, new to the Collection, presented by Granville J. Altman, Esq., F.Z.S., on May 16th.

1 Civet (Viverra civetta), from E. Africa, and 2 Egyptian Mongooses (Mungos ichneumon), from Zagazig, presented by H.E. Hassan Hasib Pasha on May 21st.

1 Ural Owl (Syrnium uralense), from Northern Europe, presented by E. G. B. Meade-Waldo, Esq., V.P.Z.S., on May 8th.

A collection of rare Reptiles from India, received in exchange on May 21st, containing amongst others, 2 Banded Kachugas (Kachuga dhongoka), and 3 Variegated Snakes (Zamenis fasciolatus), new to the Collection, and 2 Gharials (Gavialis gangeticus).

1 Tuatera Lizard (Sphenodon punctatus), from New Zealand, deposited on May 7th.

2 Striped Skinks (Lygosoma tæniolatum), from Australia, and 1 New Zealand Skink (Lygosoma lineo-ocellatum), new to the Collection, purchased on May 1st.

1 Orsini's Viper (Vipera ursinii), from Europe, new to the Collection, purchased on May 4th.

2 Malayan Tapirs (*Tapirus indicus*) 39, from Palembang, Sumatra, received in exchange on June 22nd.

1 Grys-bok (Nototragus melanotis) 3, from Cape Colony, presented by W. Lester, Esq., on June 3rd.

1 Shoebill (Balæniceps rex), from the Sudan, presented by Lt.-Gen. Sir Francis Wingate, G.C.V.O., H.M.Z.S., on June 29th.

2 Ocellated Turkeys (Meleagris ocellata), from Central America, deposited on June 24th.

2 Chestnut-bellied Rock-Thrushes (*Petrophila erythrogastra*), from the Himalayas, new to the Collection, received in exchange on June 17th.

2 Brown-backed Robins (Thamnobia cambaiensis), from India, new to the Collection, purchased on June 18th.

1 Temminck's Robin (*Erithacus komadori*), from Japan, new to the Collection, presented by Wilfred Frost, Esq., on June 14th.

2 Grey Thrashers (*Toxostoma cinereum*), from Lower California, new to the Collection, presented by H. D. Astley, Esq., F.Z.S., on June 15th.

A 194

6 Chilian Siskins (Chrysomitris uropygialis), new to the Collection, presented by Arthur C. Macdonald, Esq., on June 26th.

2 Himalayan White-throated Ground-Thrushes (Geocichla cyanonotus), bred in the Menagerie on June 15th.

12 Russell's Vipers (Vipera russelli), born in the Menagerie on June 28th.

l African Buffalo (Bubalus caffer) 3, from the Ishasha River, Uganda, presented by Capt. E. H. Reid on July 29th.

1 Vaal Rhe-bok (Pelea capreolus) 3, from Basutoland, presented by M. H. Bosworth Smith, Esq., on July 6th.

2 Yellow-headed Wagtails (Motacilla citreola) and 1 Brown Shrike (Lanius cristatus), from India, new to the Collection, presented by Wilfred Frost, Esq., on July 25th.

1 Changeable Hawk-Eagle (Spizaëtus limnaëtus), from India, new to the Collection, deposited on July 25th.

1 Hemprich's Gull (Larus hemprichi), hatched in the Menagerie on July 22nd.

1 Black-and White Cobra (Naia melanoleuca), from Dunkwa, Gold Coast, presented by Dr. H. G. F. Spurrell, F.Z.S., on July 16th.

1 Snake-Fish (Polypterus senegalus), from the Upper Nile, presented by the Rev. Archibald Shaw on July 9th.

1 White-thighed Guereza (Colobus vellerosus), from West Africa, presented by Miss Jean Aylwin, F.Z.S., on August 30th.

1 Roebuck fawn (Capreolus capreolus), from Ross-shire, presented by the Earl of Altamont, F.Z.S., on August 1st.

Mount Morrison Laughing-Thrush (Trochalopterum 1 morrisonianum), from Formosa, new to the Collection, deposited on August 5th.

Magpie-Tanager (Cissopis leveriana), 3 Australian Crimson Finches (Neochmia phaëton), 2 Peale's Parrot-Finches (Erythrura pealei), and 6 Douglas Quails (Lophortyx douglasi), all bred for the first time in the Menagerie.

1 Matamata Terrapin (Chelys fimbriata), from Brazil, presented by Oswald Allen, Esq., on August 10th.

12 Six-banded Cyprinodons (Haplochilus sexfasciatus), from West Africa, new to the Collection, presented by Dr. H. G. F. Spurrell, F.Z.S., on August 21st.

4 Pelzeln's Gazelles (Gazella pelzelni), presented by Dr. R. E. Drake-Brockman, F.Z.S., on September 26th.

1 Pelzeln's Gazelle (Gazella pelzelni), presented by A. Gibbs, Esq., on September 26th.

T in it .

I Capybara (Hydrochærus hydrochærus), presented by Sir Walter Egerton, K.C.M.G., F.Z.S., and J. J. Nunan, Esq., on September 2nd.

1 White-tailed Gnu (Connochates gnu), presented by the Government of South Africa on September 28th.

1 Kordofan Giraffe (Giraffa camelopardalis antiquorum) 3, presented by Lt.-Gen. Sir Francis Reginald Wingate, G.C.V.O., H.M.Z.S., K.C.M.G., C.B., D.S.O., on September 13th.

1 Brown Tyrant (Myiarchus tyrannulus), from Uruguay, new to the Collection, presented by Mrs. E. F. Dickinson on September 3rd.

1 Great Indian Bustard (*Eupodotis edwardsi*), new to the Collection, presented by Sir John Hewett, K.C.S.I., F.Z.S., on September 30th.

2 European Bee-eaters (Merops apiaster), received in exchange on September 11th.

2 Snake-headed Fishes (Ophiocephalus punctatus), from India, new to the Collection, received in exchange on September 7th.

1 African Buffalo (Bubalus caffer) ?, from the Sezibwa Swamp, Uganda, presented by H. M. Birch, Esq., on October 22nd.

1 Fossa (Cryptoprocta ferox) &, from Madagascar, purchased on October 23rd.

1 Pampas Cat (Felis pajeros), 1 Pampas Cavy (Cavia rufescens), 3 Pampas Gerbilles (Reithrodon typicus), and 2 Pampas Field-Mice (Akodon arenicola), from Argentina, the three last-named new to the Collection, presented by Wilfred A. Smithers, Esq., C.M.Z.S., on October 16th.

1 Argentine Mocking-bird (*Mimus modulator*) and 3 Pelzeln's Saffron-Finches (*Sycalis pelzelni*), from Argentina, new to the Collection, presented by Wilfred A. Smithers, Esq., C.M.Z.S., on October 16th.

1 Black-headed Hangnest (*Icterus melanocephalus*), from Mexico, new to the Collection, presented by W. O. Danckwerts, Esq., K.C., F.Z.S., on October 10th.

2 Great-billed Ravens (*Corvultur crassirostris*), from N.E. Africa, new to the Collection, presented by the Marquess of Tavistock, F.Z.S., on October 3rd.

1 Yellow-fronted Barbet (Cyanops flavifrons), from Ceylon, new to the Collection, purchased on October 17th.

2 Orange-bellied Fruit-Pigeons (*Ptilopus iozonus*), 2 Pearlspotted Fruit-Pigeons (*Ptilopus zonurus*), 1 Wallace's Fruit-Pigeon (*Ptilopus wallacei*), and 1 Yellow-bellied Ground-Pigeon (*Phlogænas helviventris*), from the Aru Islands, all new to the Collection, purchased on October 15th.

4 White-throated Tree-Partriges (Arboricola crudigularis), from Formosa, new to the Collection, received on deposit on October 23rd.

3 Leith's Snakes (*Psammophis leithii*), from S.W. Asia, new to the Collection, purchased on October 15th.

1 Humboldt's Saki (Pithecia monachus), from Iquitos, purchased on November 20th.

1 Kusimanse (Crossarchus obscurus), from Axim, Gold Coast, presented by R. W. Brent, Esq., on November 8th. 2 Black-spined Porcupine Anteaters or Echidnas (Zaglossus nigroaculeatus?) from the Charles Louis Mountains, New Guinea, new to the Collection, deposited on November 27th. 2 Ruffed Lemurs (Lemur varius) & ?, received in exchange on December 16th.

1 White-tailed Gnu (Connochates gnu) ?, purchased on December 10th.

3 Mahali Weaver-birds (*Plocepasser mahali*), from South Africa, new to the Collection, received in exchange on December 17th.

1 Pink-browed Rose-Finch (*Propasser rhodochrous*), from the Himalayas, new to the Collection, presented by W. H. St. Quintin, Esq., F.Z.S., on December 19th.

1 Nepalese Eagle-Owl (Huhua nipalensis), from the Maikola Valley, East Nepal, purchased on December 4th.

1 Bushmaster (Lachesis mutus), from Trinidad, presented by the Baron Leijonhufvud, F.Z.S., on December 10th.

The thanks of the Society are due to many Steamship Companies who have given valuable assistance in the transport of Animals, and in particular to Messrs. Alfred Holt & Co., who carried the Malay Collection of Animals from Port Swettenham to London, free of freight; to the British India Steamship Company, which has frequently conveyed Animals consigned to the Society, free of charge, and this year made special arrangements for conveying the King's Nepal Collection; to the White Star Line; and to the Atlantic Transport Company which has been of great service in relation to the frequent exchanges between the Society and the Zoological Society of New York.

The Society has also received much help from its Corresponding Members, and from the officers of kindred institutions, amongst whom may be mentioned in particular, Dr. Hornaday, the Director of the Zoological Park at New York, the Superintendent of the Zoological Gardens at Calcutta, the hon. secretary of the Bombay Natural History Society, and Mr. H. C. Robinson, C.M.Z.S., the

Director of the Federated Malay States Museums.

List of the Species new to the Collection exhibited during the year 1912.

The following list gives the names of the specimens exhibited in 1912 which are referable to genera or species not included in the last (ninth) edition (1896) of the List of Animals, or in subsequent Annual Reports. It contains 10 Mammals, 30 Birds, 14 Reptiles, and 2 Fishes. Except in the case of Reptiles the numbers are considerably lower than for 1911, but it contains several very interesting generic types. No special effort has been made to obtain representatives of species, the chief interest of which is that they have not happened to be exhibited by the Society before, but no opportunity has been lost of endeavouring to maintain the Collection as a representative exhibition of distinctive kinds of animals.

The figures placed before each name indicate its approximate position in the List of Animals.

I.—MAMMALS.

- 232 a. Mungos brachyurus Gray. Short-tailed Mongoose. Hab. Malay Peninsula.
 - a &. Presented by the Government of 'The Federated Malay States, June 24th, 1912.
- 249 a. Canis laniger Hodgson. Woolly Wolf.

Hab. Himalayas.

- a S. Presented by H.M. the King, May 21st, 1912.
- 404 a. Petaurista nitidus Desmanest. Black-tailed Flying Squirrel.

Hab. Formosa.

- a. Presented by Walter Goodfellow, Esq., F.Z.S., June 20th, 1912.
- 423 b. Graphiurus spurrelli Dollm. Spurrell's Dormouse. Hab. Dunkwa Gold Coast.
 - a. Presented by Dr. H. G. F. Spurrell, F.Z.S., Feb. 12th, 1912.
- 423 d. Nyctomys sumichrasti Saussure. Sumichrast's Nightmouse.

Hab. Central America.

a. Deposited, October 14th, 1912.

433 b. Reithrodon typicus Waterhouse. Pampas Gerbille. Hab. Argentina.

T. 1 Little Owl. LUCAS, Mr. Nathaniel S., F.Z.S. 1 Kestrel. LUCCHESI, Mr. A. C. 1 Vulpine Opossum. LUFFINGHAM, Mr. W. J. 1 Common Chameleon. LUSTY, Mr. John. 1 Greater Sulphur-crested Cockatoo. LYON, Mr. A. 1 North American Turkey 9. LYVER, Mr. W. C., F.Z.S. 2 Ortolan Buntings.

McCLEAN and WORMALD, Messrs. 1 Hybrid Rosy-billed Duck.

MACDONALD, Mr. Arthur C. 6 Chilian Siskins.

MACKAY, Mr. T. 2 Turtle Doves.

McKellar, Mr. J. S. 1 Dorsal Hyrax.

McKENZIE, Miss M. 1 Red-bellied Waxbill.

McLAUGHLIN, Mr. E. A. 1 Diana Cercopitheque.

MACRAY, Mrs. J. 1 Blue and Yellow Macaw, 1 Red and Blue Macaw.

MAJOR, Mrs. E. 1 Grey Parrot.

MALENS, Miss Carey. 2 Grey-headed Love-birds.

MALLETT, Mrs. A. 1 Yellow-bellied Liothrix.

MARNOCK, Mr. George W. 1 Greater Sulphur-crested Cockatoo.

MARSDEN, Capt. 1 Grey Mongoose.

MARTIN, Mr. Edward Lynd. 1 White-throated Capuchin.

MASON, Mr. D. 1 Black-faced Spider-Monkey.

MASON, Mr. Samuel. 1 Common Marmoset.

MASTERS, Mrs. 1 Brown Capuchin.

MAYO, Mr. F. J. 1 Little Owl.

MEADE-WALDO, Mr. E. G. B., V.P.Z.S. 1 Ural Owl 3, 4 Ruffs, 2 Red-breasted Mergansers.

MILLER, Mr. T. A. J. P. 2 Common Vipers.

MILLER, Mr. Thomas. 1 Pinché Marmoset.

MILLER, the late Mr. Tinniswood, F.Z.S. 1 American Robin, 3 Common Vipers.

MILLER, Mrs. Tinniswood. 1 Yellow-shouldered Amazon.

MILLER, Miss Margaret. 1 Ring-tailed Lemur.

MILLS, Mr. Y. H., F.R.C.S. 1 Common Garden Snail (variety).

MILLSUM, Mr. O. 2 Field Saffron-Finches.

MITCHELL, Mrs. E. 1 Roseate Cockatoo.

MOCATTA, Mr. Cecil, F.Z.S. 1 West-Indian Agouti.
MONNIER, Mdlle. 1 Delalande's Geeko.
MONTAGU, Mrs. 1 Ring-tailed Coati.
MONTGELAS, The Countess. 1 Green Cercopitheque.
MORGAN, Mr. E. F. 1 European Tree-Frog.
MORGAN, Mr. T. R. 2 Green-backed Porphyrios.
MORRIS, Capt. Alfred, F.Z.S. 1 Greater Sulphur-crested Cockatoo.
MORRIS, Mr. William. 1 Patas Cercopitheque.
MOSELEY, Commander F. J., R.N. 2 Grand Galagos, 1 Blotched Genet

MOSTYN, Mr. C. L. 1 Serval, 1 Marsh Mongoose.

MOWATT, Mr. J. 1 Common Viper.

MULLER, Mr. E. M. 3 Guianan Love-birds.

MUNT, Mr. Henry, F.Z.S. 16 Pond-Snails.

MUNTON, Mr. F. 1 Glass Snake.

MURRAY, Major James. 1 Raven.

NAPIER AND ETTRICK, Lady. 1 Blackbird, 1 Song Thrush.

NASH, Mr. E. F. 1 Tantalus Cercopitheque.

NICOL, Mr. N. 1 Algerian Tortoise.

NORMAN, Mr. W. A. 1 Short-tailed Wallaby, 1 Laughing Kingfisher.

NORMAN, Mrs. C. F. 2 Cockatiels.

NUNAN, Mr. J. J. (See Egerton, Sir Walter.) 1 Capybara.

OLIVER, Capt. Douglas G., F.Z.S. 2 Snow Leopards 3 3. ORAM, Mrs. Minnie. 1 Greater Sulphur-crested Cockatoo. ORMSBY, Miss Edyttes M. 1 Kestrel.

ORRINSMITH, Miss N. F. 1 Hamster.

O'SULLIVAN-BEARE, Mr. D. R. 2 Black-eared Marmosets.

PAGE, Mr. R. Pearce, F.Z.S. 1 Grey Mongoose, 2 Egyptian Jerboas, 6 Common Chameleons, 1 Darkgreen Snake, 2 Vivacious Snakes, 6 Common Snakes, 1 Leopardine Snake, 1 Dahl's Snake, 1 Viperine Snake, 5 Slowworms.

PALMER, Mr. G. W. 1 Cheer Pheasant.

PARRY, Miss A. 1 Magpie.

PATTERSON, Lieut.-Col. J. H. 1 African Civet Cat, 2 Servals & ?.

PEACHEY, Mrs. M. 1 Ring-tailed Opossum.

PELHAM, Admiral F. S. 1 Goshawk.

PEMBERTON, Mr. Percy Leigh. 1 Common Viper.

PENNANT, Lady Edith Douglas-. 1 Black-headed Wagtail, 2 Ruffs.

PENROSE, Dr. F. G., F.Z.S. 3 Common Partridges. PERACCA, Count Mario, D.Sc., F.Z.S. 4 Hybrid Newts. PHILIPPS, Lady. 3 Pin-tailed Whydah-birds. PHILLIPPS, Mr. Reginald. 1 Rock Thrush. PIKE, Mr. L. G., F.Z.S. 1 Green-cheeked Amazon. PIKE, Miss Lucy E. 1 Barn Owl. PILKINGTON, Lady Kathleen. 1 Red-shouldered Starling, 1 Blue-crowned Jay, 1 Red-eared Bulbul, 1 Black Tanager, 2 Budgerigars.

C*

PITT, Miss Frances. 2 Black Rats, 2 Hooded Crows, 1 Tawny Owl.

POMEROY, Mr. W. K., F.Z.S. 2 Purple Jays, 2 Golden Hangnests, 2 Severe Macaws, 2 Brown-throated Conures, 2 Yellow-fronted Amazons, 1 Tovi Parrakeet, 1 Harpy Eagle, 1 Cayenne Rail, 1 Martinique Gallinule, 2 Double-striped Thick-knees, 1 Purplish Guan, 1 Red-tailed Guan.

POPE, Capt. E. Alexander. 1 Ring-tailed Lemur. POWELL, Mrs. 1 Herring Gull.

RATTIGAN, Mr. Gerald E. 1 Rufous-necked Weaverbird, 1 Cape Dove.

RAWSTORNE, Miss Dorothy. 1 Grey Mongoose.

REEVE, Mr. Henry F., C.M.G. 1 Lion cubs.

REEVES, Mrs. Walter. 1 Greater Sulphur - crested Cockatoo.

REID, Capt. E. H. 1 African Buffalo 8.

RICHARDSON, Major, F.Z.S. 1 Swainson's Lorikeet.

RIGG, Miss. 1 Blue-fronted Amazon.

RITCHIE, Mr. A. T., F.Z.S. 1 Grey Seal.

ROBERTS, Mr. Edward. 1 Broad-snouted Cayman.

ROBERTSON, Mr. Walter. 1 Edible Frog.

ROBINSON, Mr. A. 2 Kestrels.

ROOPER, Mr. Henry Napier, F.Z.S. 1 Martin's Cercopitheque.

RUBECK, Mrs. 1 Red and Blue Macaw.

RUSSELL, Dr. A. P. 12 Leaf Insects.

SAFFHILL, Mr. Walter. 1 Tantalus Cercopitheque 3.

ST. QUINTIN, Mr. W. H., F.Z.S. 1 Stoat, 1 Shag, 1 Pinkbrowed Rose Finch, 1 Prince of Wales's Pheasant, 2 Glass Snakes.

SALTER, Mr. Joseph. 1 Ceylonese Terrapin. SAMPSON, Dr. C. A. 2 Common Chameleons. SAVAGE, Mr. H. S. 1 Black-eared Marmoset.

SCRIVENER, Miss Maude. 1 Slowworm.
SEWELL, Mr. F. S. 1 Rose-ringed Parrakeet.
SHARP, Mr. H. 1 Saffron Finch.
SHARP, Mrs. 1 Lesser Sulphur-crested Cockatoo.
SHOLL, Mr. Edward H. 1 Snake-Fish.
SHOLL, Mr. Edward H. 1 Cut-throat Finch, 2 Barbary Turtle-Doves, 1 Skylark.
SHOOLBRED, Mr. Rupert. 1 Wild Cat.
SHORTER, Mrs. Clement. 2 Chaffinches.

SHOTTIN, Mrs. A. 1 Greater Sulphur-crested Cockatoo. SHUFELDT, Dr. R. W., C.M.Z.S. 1 Alligator Terrapin,

1 Sculptured Terrapin.

SHUFELDT, Mrs. R. W. 1 American Box Tortoise.

SKELTON, Mr. J. W. A. 2 Common Marmosets.

SLADEN, Lt.-Col. E. S. St. B., F.Z.S. 1 Roseate Cockatoo. SMART, Miss Mary. 1 Greater Sulphur-crested Cockatoo. SMITH, Mr. A. C. 1 Roseate Cockatoo.

SMITH, Messrs. A. and M. 1 Common Seal.

Sмітн, Mr. C. Lewis (see Fletcher and Smith). 2 Squirrel Monkeys.

56- SMITH, Mr. M. H. Bosworth. 1 Vaal Rhe-bok 8.

SMITH, Lt.-Col. J. Manners, V.C., C.I.E., C.V.O. 8 Lesser Pin-tailed Sand-Grouse, 7 Painted Sand-Grouse.

SMITH, Miss M. Mason. 1 Roseate Cockatoo.

SMITH, Mrs. 1 Greater Sulphur-crested Cockatoo.

SMITHERS, Mr. Wilfred A., C.M.Z.S. 1 Pampas Cat, 3 Pampas Gerbilles, 2 Pampas Field-Mice, 1 Pampas Cavy, 2 Hairy Armadillos, 2 Red-bellied Thrushes, 1 Argentine Mocking-bird, 3 Pileated Song-Sparrows, 3 Pelzeln's Saffron-Finches, 2 Bay Cow-birds, 4 Silky

Cow-birds, 5 Picui Doves, 6 Spotted Tinamous. SNELLING, Mr. Jack. 1 Tawny Owl. Solmersitz, Mr. Eugene. 1 Kinkajou. SPARKS, Mrs. Rose. 3 Magpies. SPEARPOINT, Mrs. E. 1 Bare-eyed Cockatoo. SPENCER, Mrs. Arthur. 1 Alligator. SPICER, Mr. Gilbert H., F.Z.S. 1 Little Auk. SPREATLEY, Mrs. 1 Algerian Tortoise. SPURRELL, Dr. H. G. F., F.Z.S. 1 Burnett's Cercopitheque, 1 Bosman's Potto, 1 Two-spotted Palm-

Civet, 3 Gambian Pouched Rats, 2 White-spotted Yalm-Civet, 3 Gambian Pouched Rats, 2 White-spotted Squirrels, 1 Spurrell's Dormouse, 1 Bay Duiker, 1 Eroded Cinixys, 3 Green Tree-Snakes, 1 Kirtland's Tree-Snake, 1 Spotted Burrowing Snake, 4 Nose-horned Vipers, 1 Green Viper, 2 Gaboon Vipers, 1 Black and White Cobra, 2 Smyth's Snakes, 12 Sixbanded Cyprinodons.
STACEY, Mr. Bernard. 4 Barbary Turtle Doves.
STANLEY, Miss Diana. 1 Green Lizard.
STENNING, Mr. Walter. Collection of Jumping Beans.
STOBART, Mr. Fred W. 5 Red Foxes.
STOCKWELL, Mrs. Maitland. 1 Blossom-headed Parrakeet.

 - WINGFIELD, Mr. Maurice, C.M.G. 4 Common Fire-Finches, 2 Pintailed Whydah-birds.

WOLFF, Capt. H. P. 1 Sharpe's Wood-Owl.

WORMALD, Mr. Guy. 2 Egyptian Jerboas.

WORMALD. See Messrs. McClean & Wormald. 1 Hybrid Rosy-billed Duck.

55 - WRIGHT, Mr. Francis. 1 White-throated Capuchin.

SPECIAL GARDEN IMPROVEMENT FUND.

H.M. the King, after his visit to the Gardens in 1911, graciously sent a donation of 50 guineas to the funds of the Society. The Council, as reported last year, decided to place this to a Special Improvement Fund to which Fellows were invited by circular to contribute. They resolved to appropriate what was received

C**

to certain definite improvements, mentioned below, and to ask contributors to indicate any preference that they might have.

Nature of Work.	Approximate Cost. £
Provision of Coloured Pictorial Labels for the Collection	300
Outdoor Cages for Anthropoid Apes and Monkeys	1,000
Lighting and Heating of the Reptile House and construction of Out-door Crocodile Pond	600
Moving Gardeners' Department to North Bank and clearing Site for future development	1,400

The total amount received in 1911 and 1912, including a special donation of £592 18s. 4d., from the President of the Society, H.G. the Duke of Bedford, amounted to £2,158 16s. 4d. Of this total, the President's special contribution was given for the purpose of completing the clearance of the site temporarily occupied by the Nepal and Malay Collections, and so preparing the way for such a large scheme as has now been made possible by Mr. J. Newton Mappin's generosity; £161 10s. 0d. was earmarked by the donors for coloured labels; £42 3s. 0d. for the Reptile House; £41 14s. 0d. for Outdoor Cages for Monkeys, whilst the remainder was either destined for moving the Gardeners' Department or was left to the decision of the Council.

The expenditure paid out of the Fund has been as

follows :---

(1.) General Purposes—
Moving Gardeners' Department £1,154 9 9
" Swine Enclosures ... 164 9 5
" Dung-pound ... 328 16 4
Clearing site and burning ballast 265 13 10

£1,913 9 4

Thus the largest part of the scheme has been accomplished.

(2) Provision of Coloured Pictorial Labels for the Collection... £47 1 3

The prosecution of this most important improvement could not be hurried until a satisfactory method had been Sketches in oil-paints on zinc, such as those discovered. formerly employed in our Gardens, or on wood, as in the Bronx Park at New York, fade very rapidly with exposure. Various methods of mounting sketches in glass frames proved unsatisfactory, and drawings made with fusible colours on opaline glass, such as are used in the Antwerp Zoological Gardens, were impermeable to the atmosphere, but were brittle and presented great difficulties to the artists. Mr. Gerald Duckworth, F.Z.S., directed the attention of the Secretary to the process of the Jerne Indelible Showcard Co., the Manager of which took much trouble to devise a method suitable for our purpose. Either coloured prints or water-colour drawings on special paper can be employed, and the result is extremely attractive and appears to be highly resistant to light and weather, and labels are now being made as quickly as possible.

The balance of £114 8s. 9d. to the credit of the label account on December 31st, 1912, will probably be expended in the course of 1913; the amounts contributed for outdoor cages for monkeys and for improvements at the Reptile House will be held over until they can be made up to the sums required.

STATE OF THE FINANCES.

The Report of the Auditors of the Accounts for 1912

is issued to Fellows, bound at the end of this Report. In 1905, the Auditors, acting on the advice of Mr. W. B. Keen, F.Z.S., Chartered Accountant, the professional Auditor of the Society, issued their Report on the finances of 1904 in a new form, replacing the old statement of Assets and Liabilities by a formal Balance Sheet, and the old statement of Receipts and Payments within the year by a dissection of Income and Expenditure belonging to the year. The Auditors of the Accounts of the year 1906, after discussion of the principles involved, continued the new system, which has been followed since. As, however, some of the Fellows prefer a statement on the simple Receipts and Payments system, such information is given in the next paragraph.

The total sum actually received within the year was £45,692 7s. 2d. From this there has to be deducted the overdraft brought forward from Dec. 31st, 1911, amounting to £1,664 8s. 1d., leaving £44,027 19s. 1d. Of this total £894 12s. 4d. was contributed to the Special Garden Improvement Fund, dealt with in a separate account (see page 77 of this Report), and so is deducted here, leaving £43,133 6s. 9d. There is also to be deducted the sum of £795, invested to add to the Composition Account (being the fees of 17 new compounders at £45, and of one Fellow elected before November 26th, 1906, who compounded in 1912 at the old rate of ± 30). There was thus left the sum of £42,338 6s. 9d. available for the expenditure of the year. The ordinary payments for the year amounted to £37,444 2s. 7d., leaving a balance on the working of the Society for the year amounting to £4,894 4s. 2d. From this has to be deducted the sum of £2,000, the portion of the loan repaid to the Bankers, and £1,002 11s. 7d., interest on the loan, leaving £1,891 12s. 7d. available for extraordinary expenditure. Of that sum a total of £955 6s. 5d. was expended in connection with the Malay and Nepal Collections. There was thus left a surplus at the end of the year amounting to £936 6s. 2d. made up by a balance at the Bank of £787 2s. 9d. and cash at the office amounting to £149 3s. 5d.

It will be noticed that the details of the above figures do not correspond exactly with the similar entries in the Auditors' report, as what is given here is a summary of the actual payments within the year, whilst the Auditors analyse the figures so as to make them refer to expenditure strictly belonging to the year.

The improvement in the Balance of £5,559 13s. 7d. is the sum of the net increase in Assets plus the net decrease of Liabilities. As was arranged, the sum of $\pm 2,000$ was repaid to the Bankers, so that the Loan Account now stands at $\pounds 26,000$. The option of purchase has not been exercised on Hanover Square, but, as the site is now occupied by a substantial building actually in use, the security has increased greatly in value. Although no credit is taken for the buildings at the Gardens, the balance of assets over liabilities (General Purposes) now stands at the substantial figure of £44,784 14s. 2d.

The item "Composition Fund (not separately invested)," which stood in 1905 at over £7,000, has now been written down to $\pounds 2,680$, and will soon disappear. Since 1905 all composition fees have been actually invested, and the New Composition Fund now stands at $\pounds 4,740$, and represents a real cash asset.

Comparison of Income, 1911 and 1912.

A rather smaller number of Fellows was elected in 1912 than in 1911, but in every important respect the income was improved and was the largest in the history of the Society.

Comparison of Ordinary Expenditure, 1911 and 1912.

TOTALS £32,134 3 8 £34,188 14 5 +£2,054 10 9

With the growth of the Society, the expenditure continues to increase. The most serious item was the increase in the cost of provisions, due largely to the higher prices that had to be paid for hay, straw, and horses. The decrease in the cost of advertisements was due to there being no expenditure on posters in the course of the year.

CONCLUSION.

The Council are again able to congratulate the Fellows on the steady progress of the Society. The total number of Fellows and the income derived from their subscriptions continues to increase, and notwithstanding the rather unfavourable weather, the attendance of visitors and the receipts for their admission were the highest in the history of the Society. Improvements at the Gardens continue to be made as rapidly as the financial position permits, and the scientific work of the Society has been maintained at a high level of efficiency.

In the course of the year the following meetings for the business of the Society have been held :—

Council		 	19
Monthly Business Meeti	ings	 	10
Scientific Meetings		 	12
Garden Committee		 	12
House and Library Com	mittee	 	5
Publication Committee		 	12
Prosectorial Committee		 	10
Zoological Record Comm	aittee	 	1
Finance Committee		 	12

The Council wish to acknowledge the assistance they have received during the past year from the Committee of Publication, upon which are devolved, in accordance with the By-laws, the arrangement and supervision of the Society's Scientific Publications.

The Council have finally to ask you to thank those Fellows of the Society who have audited the Accounts for the past year.

Signed (for the Council), P. CHALMERS MITCHELL, Secretary.

Regent's Park, N.W., 19th March, 1913.

REPORT

OF THE

AUDITORS OF THE ACCOUNTS

OF THE

ZOOLOGICAL SOCIETY

OF LONDON,

APPOINTED JANUARY 15TH, 1913.

THE Committee of Auditors of the Zoological Society of London (with the assistance of the Professional Auditor, who has certified the whole of the Accounts in detail), having examined the books and accounts for the year ended 31st December, 1912, submit to the Society an abstract of the Accounts, together with an estimate of the Assets and Liabilities at the close of the year.

It will be seen that the excess of Income over Ordinary Expenditure has been $\pounds 7,775$ 19s. 10d. while there has been an Extraordinary expenditure of $\pounds 1,907$ 18s. 0d. including interest on the Loan from the Bankers for the New Buildings, which Loan has been reduced by $\pounds 2,000$ and now stands at $\pounds 26,000$ for which the Bankers hold security.

The old Composition Fund, not separately invested, has been reduced by the transfer of £668 to Income and Expenditure Account in accordance with the usual practice, while the new Composition Fund has been increased by Composition fees received amounting to £795. This Fund now stands at £4,740 and is separately invested, the Income therefrom being carried into the Income and Expenditure Account.

The investments in

£3,411 1s. 0d. India $3\frac{1}{2}$ per cent. Stock, £1,443 19s. 1d. London County $3\frac{1}{2}$ per cent. Stock and

£123 1s. 0d. $2\frac{1}{2}$ per cent. consolidated Stock which stand in the Balance Sheet at the cost price of £4,795 had on December 31st, 1912, a market value of £4,465 10s. 0d.
