

Memor. of Mr Hodgson's Zoology

The species are, Mammals of Nepal
126 - Mammals of Tibet 47 - Birds of
Nepal 656.

The collections consist of Drawings
of skins & of skeletons

The Drawings amount to 108 plates of Ana-
tomical delineations & 814 of ordinary fig.
of Beast & Bird

The skins now brought to England
& delivered to Brit. Mus. consist

402 Mammals & 4444 Birds.

The osseous specimens delivered with them amount to 1069

Besides the above, which have been just now handed over by me to the Museum, a large collection of specimens & drawings was made over in Jan^y 1843 by my father, whereof I find memo 709. Bird skins 408. Quadr. skins 49

The specimens & drawings having been presented to Brit. Mus. the desideratum now is to ascertain that the whole are procured & properly preserved
