

ellettsall, Calcutta
4 August, 1848.

My dear Sir,

I have the pleasure to enclose you
a few further remarks from Mr. Frith with reference
to your last interesting communication regarding
the wild silk worm of the Sant forests.

I have not forgotten your request for
seeds which shall be complied with fully in the
Society's annual consignments arrive: in the meantime
I have sent you a small assortment of acclimated
reputable seeds, enclosed in a box which I
re-spached by dak banyan, to Dr. Campbell, a few
days since.

Yours truly

James Hume
